

For all exercises, you must read or calculate 7 different costs from one graph

ANC

Read: ATC, NMC, AVC, AFC

ATC

MC

calculate: TC, VC, FC

$$AVC \times Q = VC$$

$$ATC \times Q = TC$$

ANC

ATC

$$AFC \times Q = FC$$

$$AFC = ATC - AVC$$

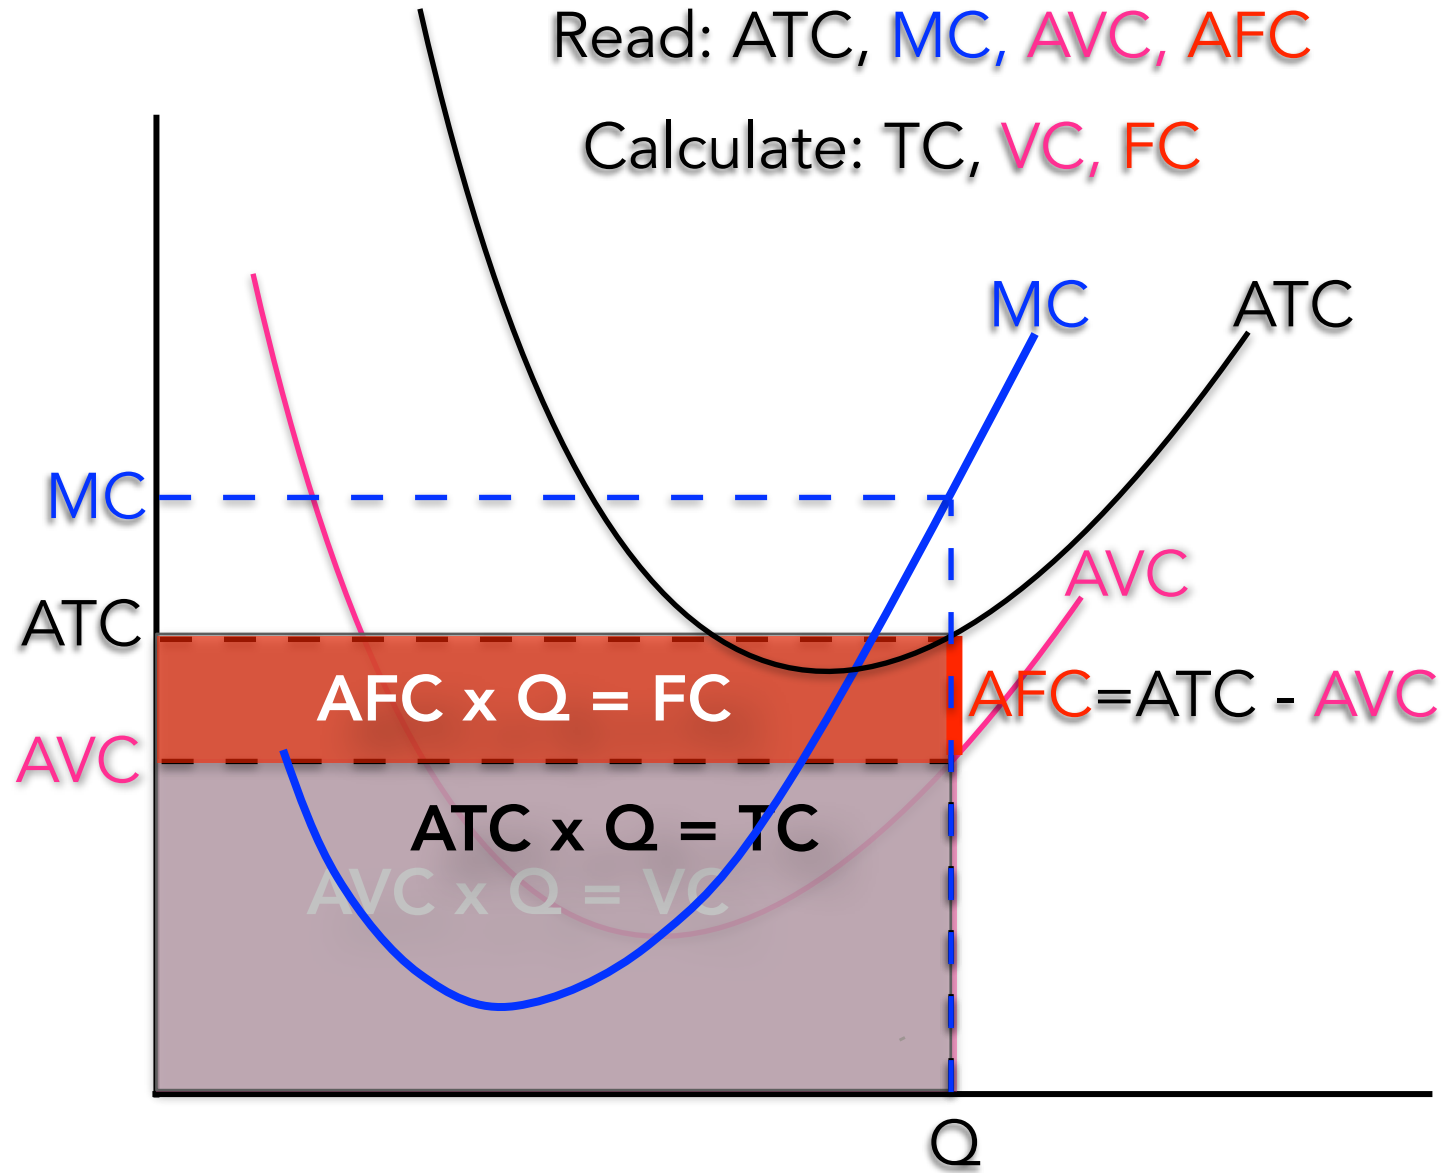

M

C

For all exercises, you **must read or calculate 7** different costs from one graph

For all exercises, you **must read or calculate 7** different costs from one graph

Read: ATC, **MC**, **AVC**, **AFC**

Calculate: TC, **VC**, **FC**
