x100

The **ONE** number that **represents all**
prices of goods and services produced
in 2019 is 200

GDP Deflator for 2019 = 200

The **ONE** number that **represents all** prices of goods and services produced in 2019 is 200

Which says that prices in 2019 are **double** what prices were in the base year

Nominal GDP is **twice** as large as **Real** GDP

2×100
