

Inflation Costs

- **When past inflation is high and volatile it is difficult to guess**

- **If lenders guess inflation wrong** (if they guess inflation to be lower than it turned out to be) they end up earning less (real) interest than agreed with the borrower

- **Borrowers end up paying less (real) interest than agreed with the lender**

20

Inflation

**Arbitrary redistribution: lenders
lose real income, borrowers gain
real income**

Inflation Costs

- When past inflation is high and volatile it is difficult to guess
- If **lenders guess inflation wrong** (if they guess inflation to be lower than it turned out to be) they end up earning less (real) interest than agreed with the borrower
- Borrowers end up paying less (real) interest than agreed with the lender

Inflation → **Arbitrary redistribution:** lenders lose real income, borrowers gain real income
