

The Concept of Plant Size

We measure plant size as "capacity to produce in a given period of time"

Examples:

A Farm can produce X Bushels of wheat/month

An Advertising Agency can handle X Number of clients/
month

A Restaurant can produce X Number of meals/month

A Factory can produce X Units/month

The Concept of Plant Size

We measure plant size as “**capacity** to produce in a given period of time”

Examples:

A Farm can produce X Bushels of wheat/month

An Advertising Agency can handle X Number of clients/
month

A Restaurant can produce X Number of meals/month

A Factory can produce X Units/month

Plant is not the same as
