

To calculate the **resulting** change in Equilibrium

Price use the following formula:

$\% \Delta \text{Supply}$

Peo

20

Pe₁

Q1

$\% \Delta \text{Supply}$

$(e^d + e^s)$

$\% \Delta$ Equilibrium
Price

If supply increase, *equilibrium* price decrease

So

S₁

D

O

A red starburst shape with the text "Absolute Value" inside.

Absolute
Value

The Effect of an Increase in Supply

To calculate the **resulting** change in Equilibrium Price use the following formula:

Absolute Value

%Δ Equilibrium Price

%Δ Supply

=

-

$(|e^d| + e^s)$
