PS at
Equilibrium

$$Q^d = 1000$$

$$Q^s = 8000$$

The quantity sold
drops to 100

Producers can **only** get
Producer Surplus on
100 units

$$Q^d = 100$$

PS lost

PS after
floor is
imposed

PS

gained

The imposition of a Floor

Results in a decrease in the number of units sold by producers

Producers get a **higher price** on the fewer units they sell

The imposition of a Floor

Producers get a **higher price** on the fewer units they sell

Producers can **only** get
Producer Surplus on
100 units

Price Floor: 0.8

Results in a **decrease** in the number of units sold by producers
