

For all exercises, you must read or calculate 7 different costs from one graph

AVC

Read: ATC, MC, AVC, AFC

**ATC**

MC

Calculate:  $TC$ ,  $VC$ ,  $FC$

$$AVC \times Q = VC$$

AVC

ATC

$$ATC \times Q = TC$$

$$AFC \times Q = FC$$

AFC=

ATC - AVC

MC

For all exercises, you must read or calculate 7 different costs from one graph
