

In the next example, assume
that we know how many
machines we want to use and
we need to decide how many
workers to hire

K

=

6

In the next example, assume
that we ~~know~~ ^{$K=6$} how many
~~machines~~ we want to use and
we need to ~~decide~~ ^{$?$} how many
~~workers~~ ^{$=$} to hire

We know we will
use 6 machines

6	692	980	1200	1384	1550	1692
5	632	896	1096	1264	1410	1550
