

Consumer Surplus =

**Area = How much
the consumer is
willing to pay for
30 units**

30 units

If Price \equiv \$2 per unit

Area below demand
and above the price

\$

2

Area below
the Demand
curve

\$Amount the consumer is willing to pay

MINUS

\$ the consumer actually pays

Consumer

Pays \$2*30

\$60

CS

Consumer Surplus=

\$ Amount the consumer is willing to pay
MINUS
\$ the consumer actually pays

Area = How much
the consumer is
