

If you save \$1,000 at 7% Compound  
Interest

Interest earned in Year 1 =  $1000 \times 0.07 = \$70$

$$\text{Interest earned in year 2 (Y}_2\text{)} = (1000 + 70) \times 0.07 = \$74.90$$

By the end of Year 3 you have  $= \$1,000 + 70 + 74.9 + 80.1 = \$1,225$

$$\text{Interest } Y_3 = (1000 + 70 + 74.9) \times 0.07 = \$80.10$$

If you save \$1,000 at 7% **Compound**  
Interest

Interest earned in Year 1 =  $1000 \times 0.07 = \$70$

Interest earned in year 2 ( $Y_2$ ) =  $(1000 + 70) \times 0.07 = \$74.90$

Interest  $Y_3 = (1000 + 70 + 74.9) \times 0.07 = \$80.10$

By the end of Year 3 you have =  $\$1,000 + 70 + 74.9 + 80.1 = \$1,225$
