

If the market is free

and

If the market is perfectly competitive

then

Market forces will result in the **best** price

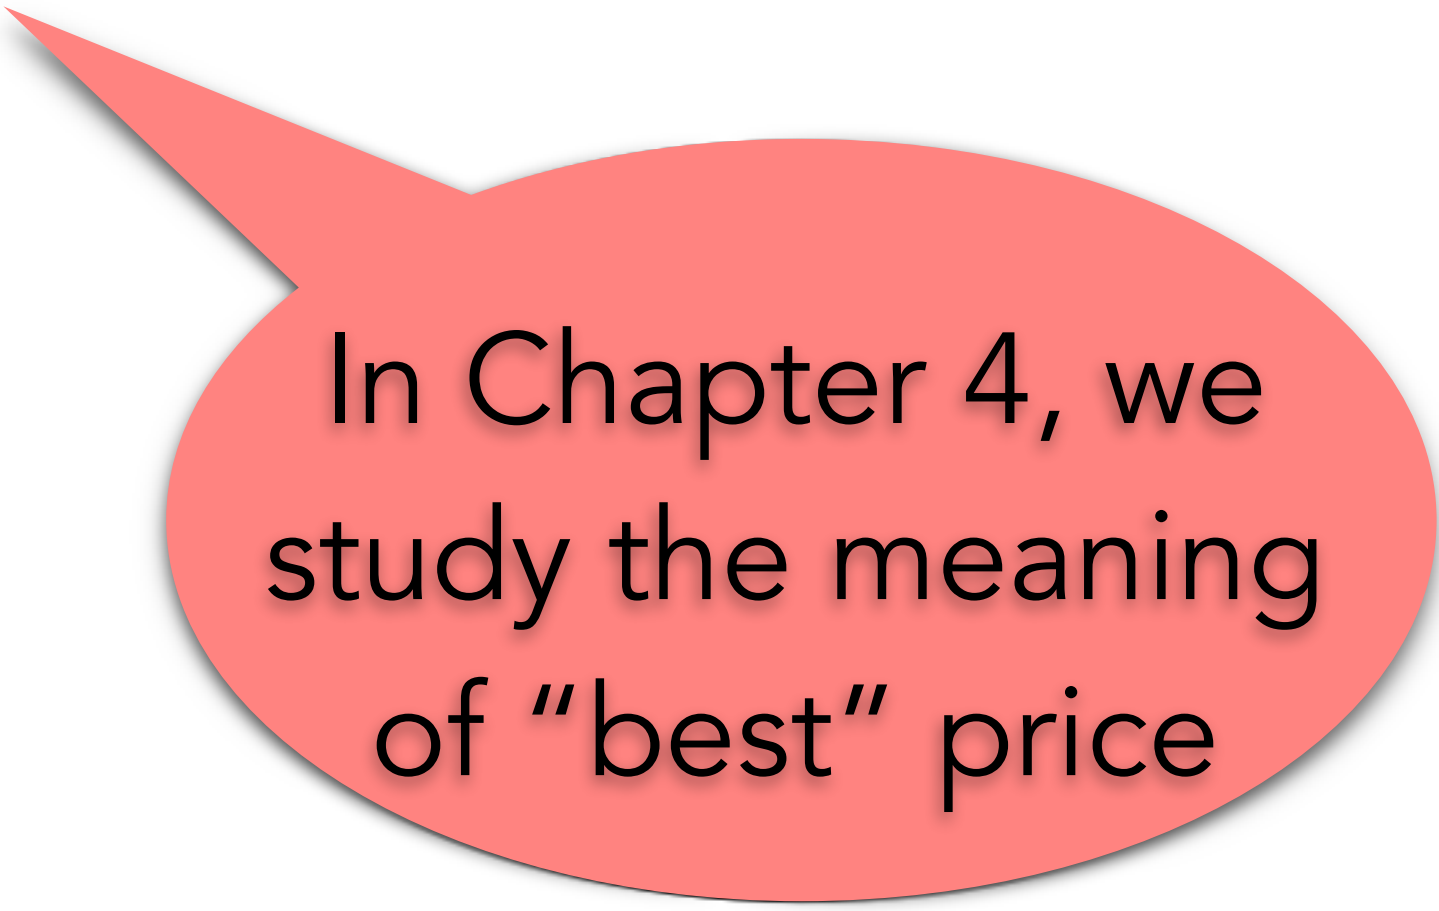

You already  
know what  
"free" means

We will study  
Perfect Competition  
in Chapter 10

In Chapter 4, we  
study the meaning  
of “best” price

Market Forces are best at deciding how is  
Income to be distributed among the four  
factors of production

If the market is **free**  
and

You already  
know what  
"free" means

If the market is **perfectly competitive**  
then

We will study  
Perfect Competition  
in Chapter 10

Market forces will result in the **best** price

**Market Forces are best at deciding** how is  
Income to be distributed among the four  
factors of production

In Chapter 4, we  
study the meaning  
of "best" price

# When a Market is NOT "Competitive"

One Seller

Many Buyers
