

Output

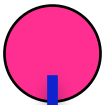

Cost per unit drops as  
the Marginal Product  
Increase

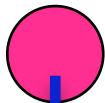

\$2 = Marginal Cost unit1

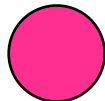

$\$0.66 = MC_3$

3

\$1 = MC \text{ unit } 2

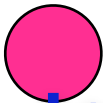

2

$\$0.50 = MC_4$

4

$\$0.40 = MC_5$

5

Marginal Cost: Cost of the  
last unit produced

Variable Costs increase with decreasing slope

2 . . . .

3

4.16 - - - - -

3.66 - - - - -

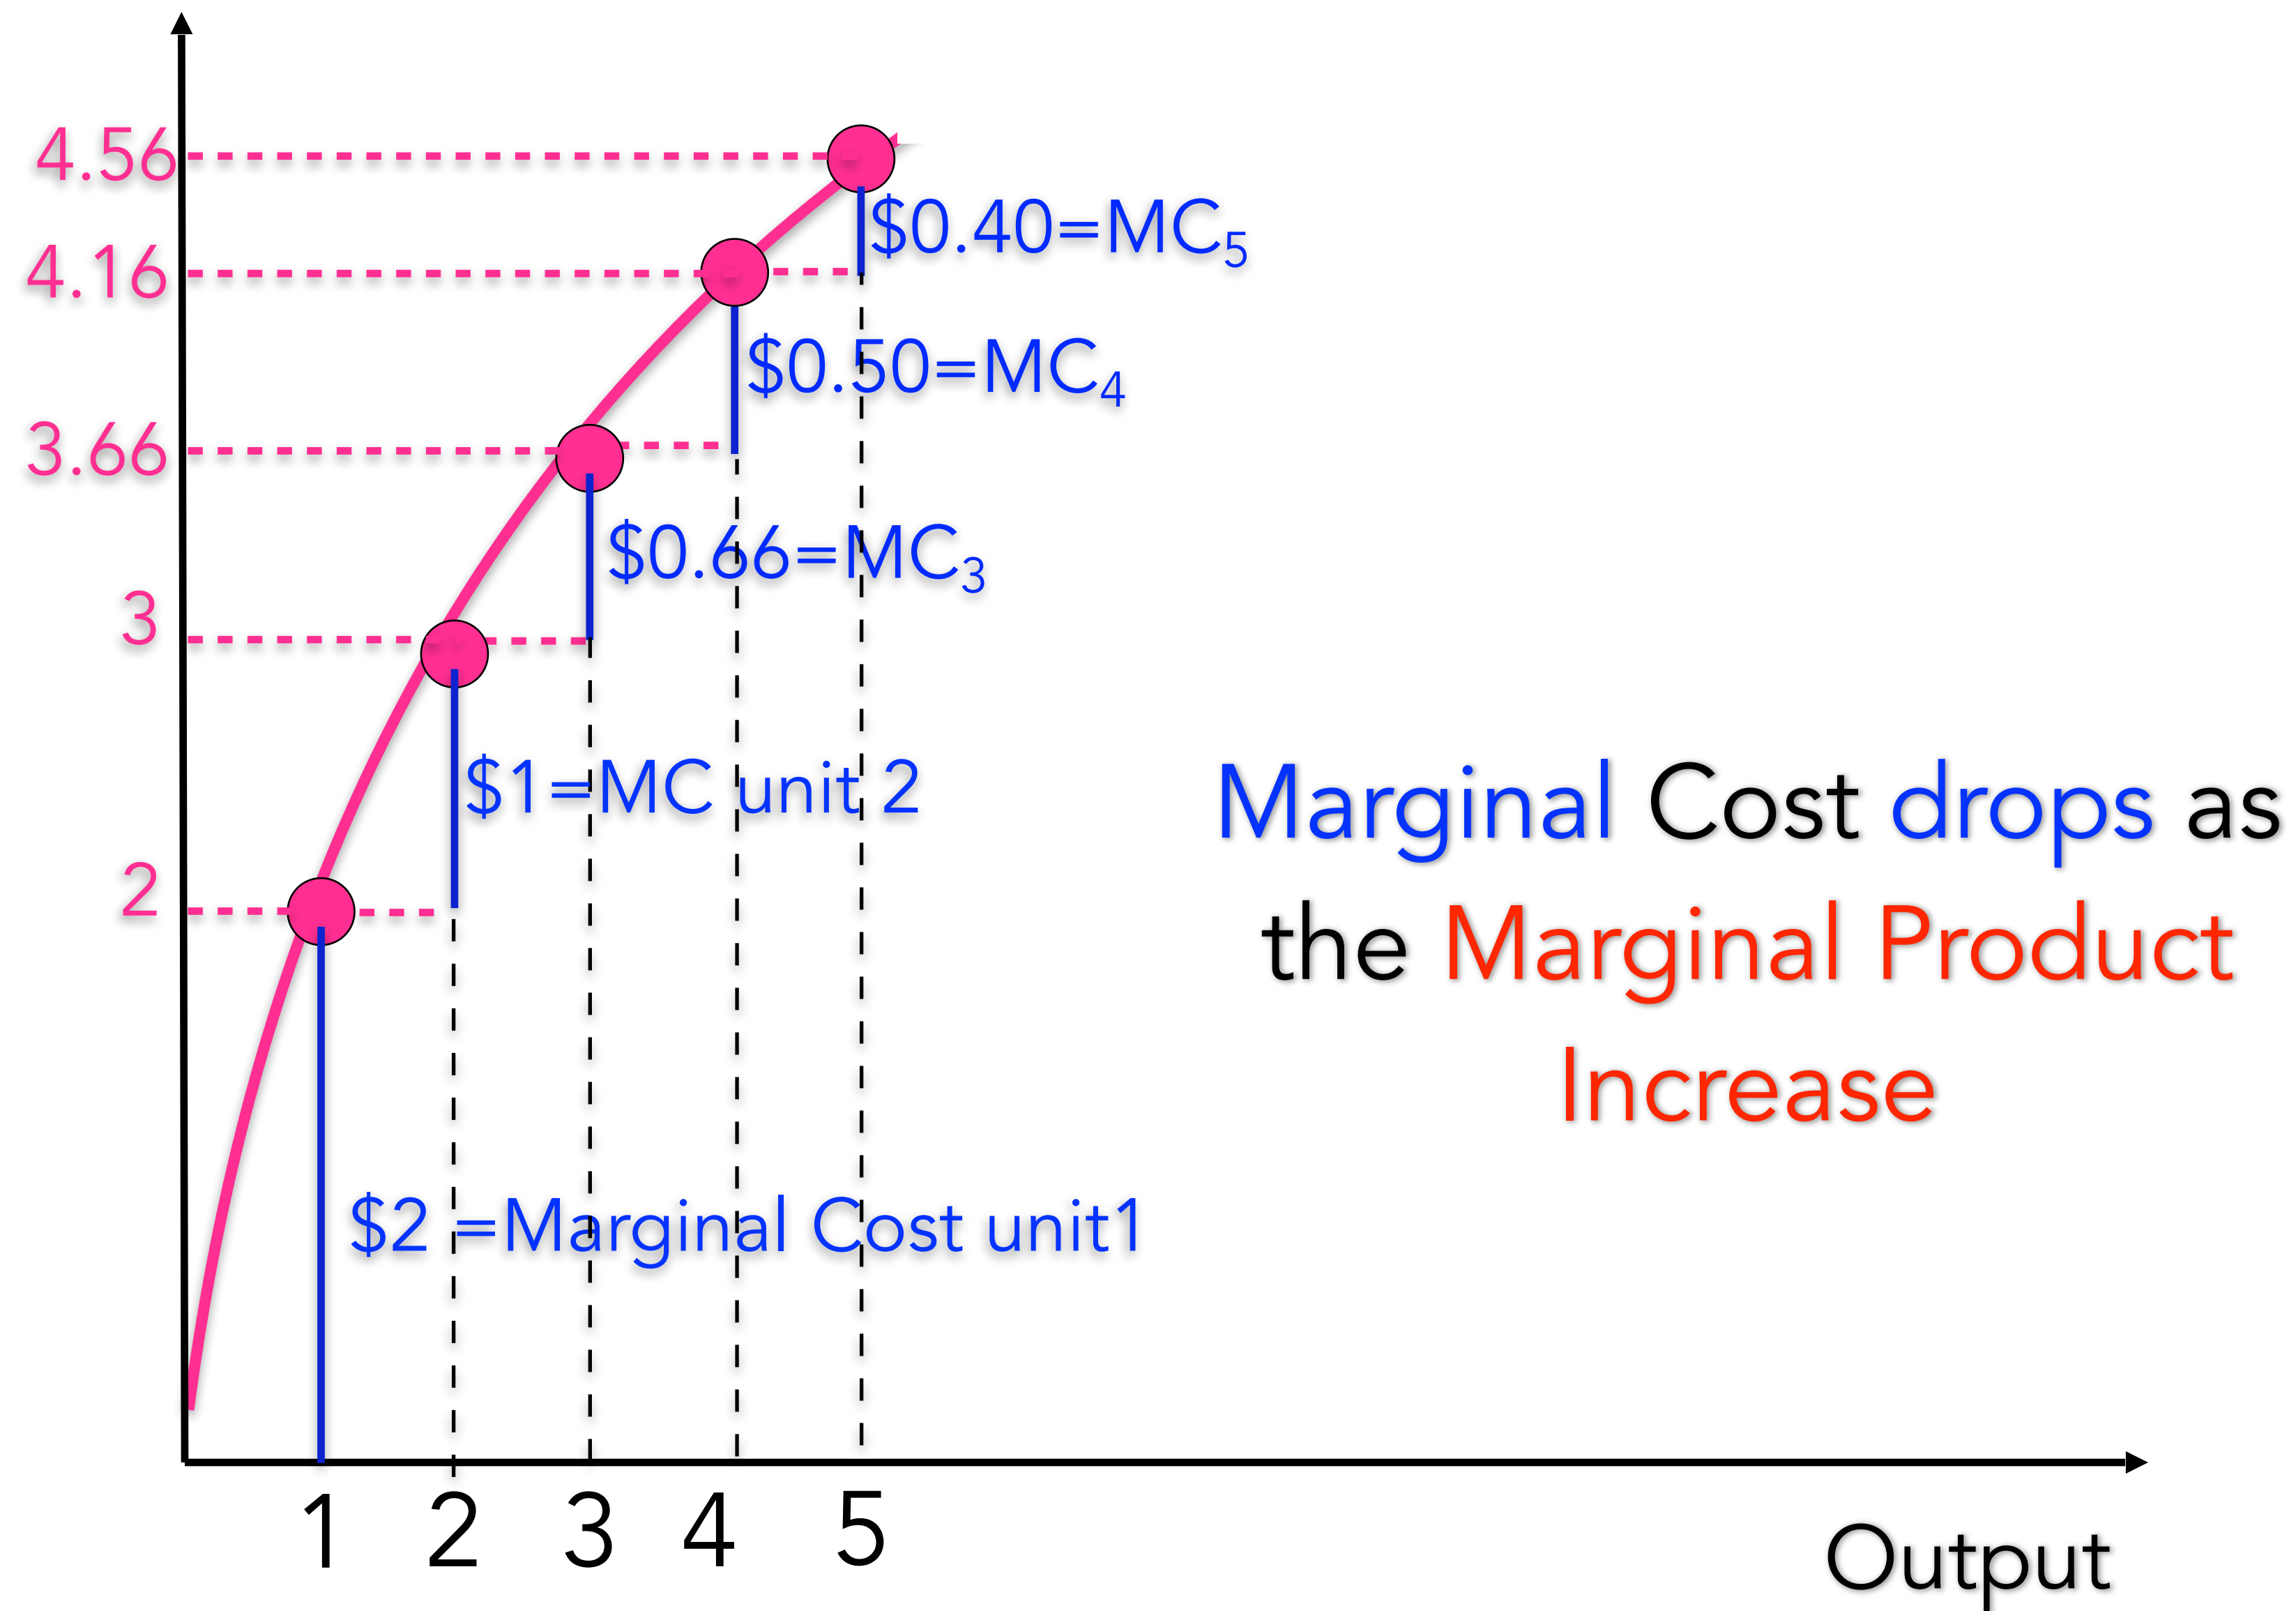

4.56.....

Marginal Cost drops as  
the Marginal Product  
Increase

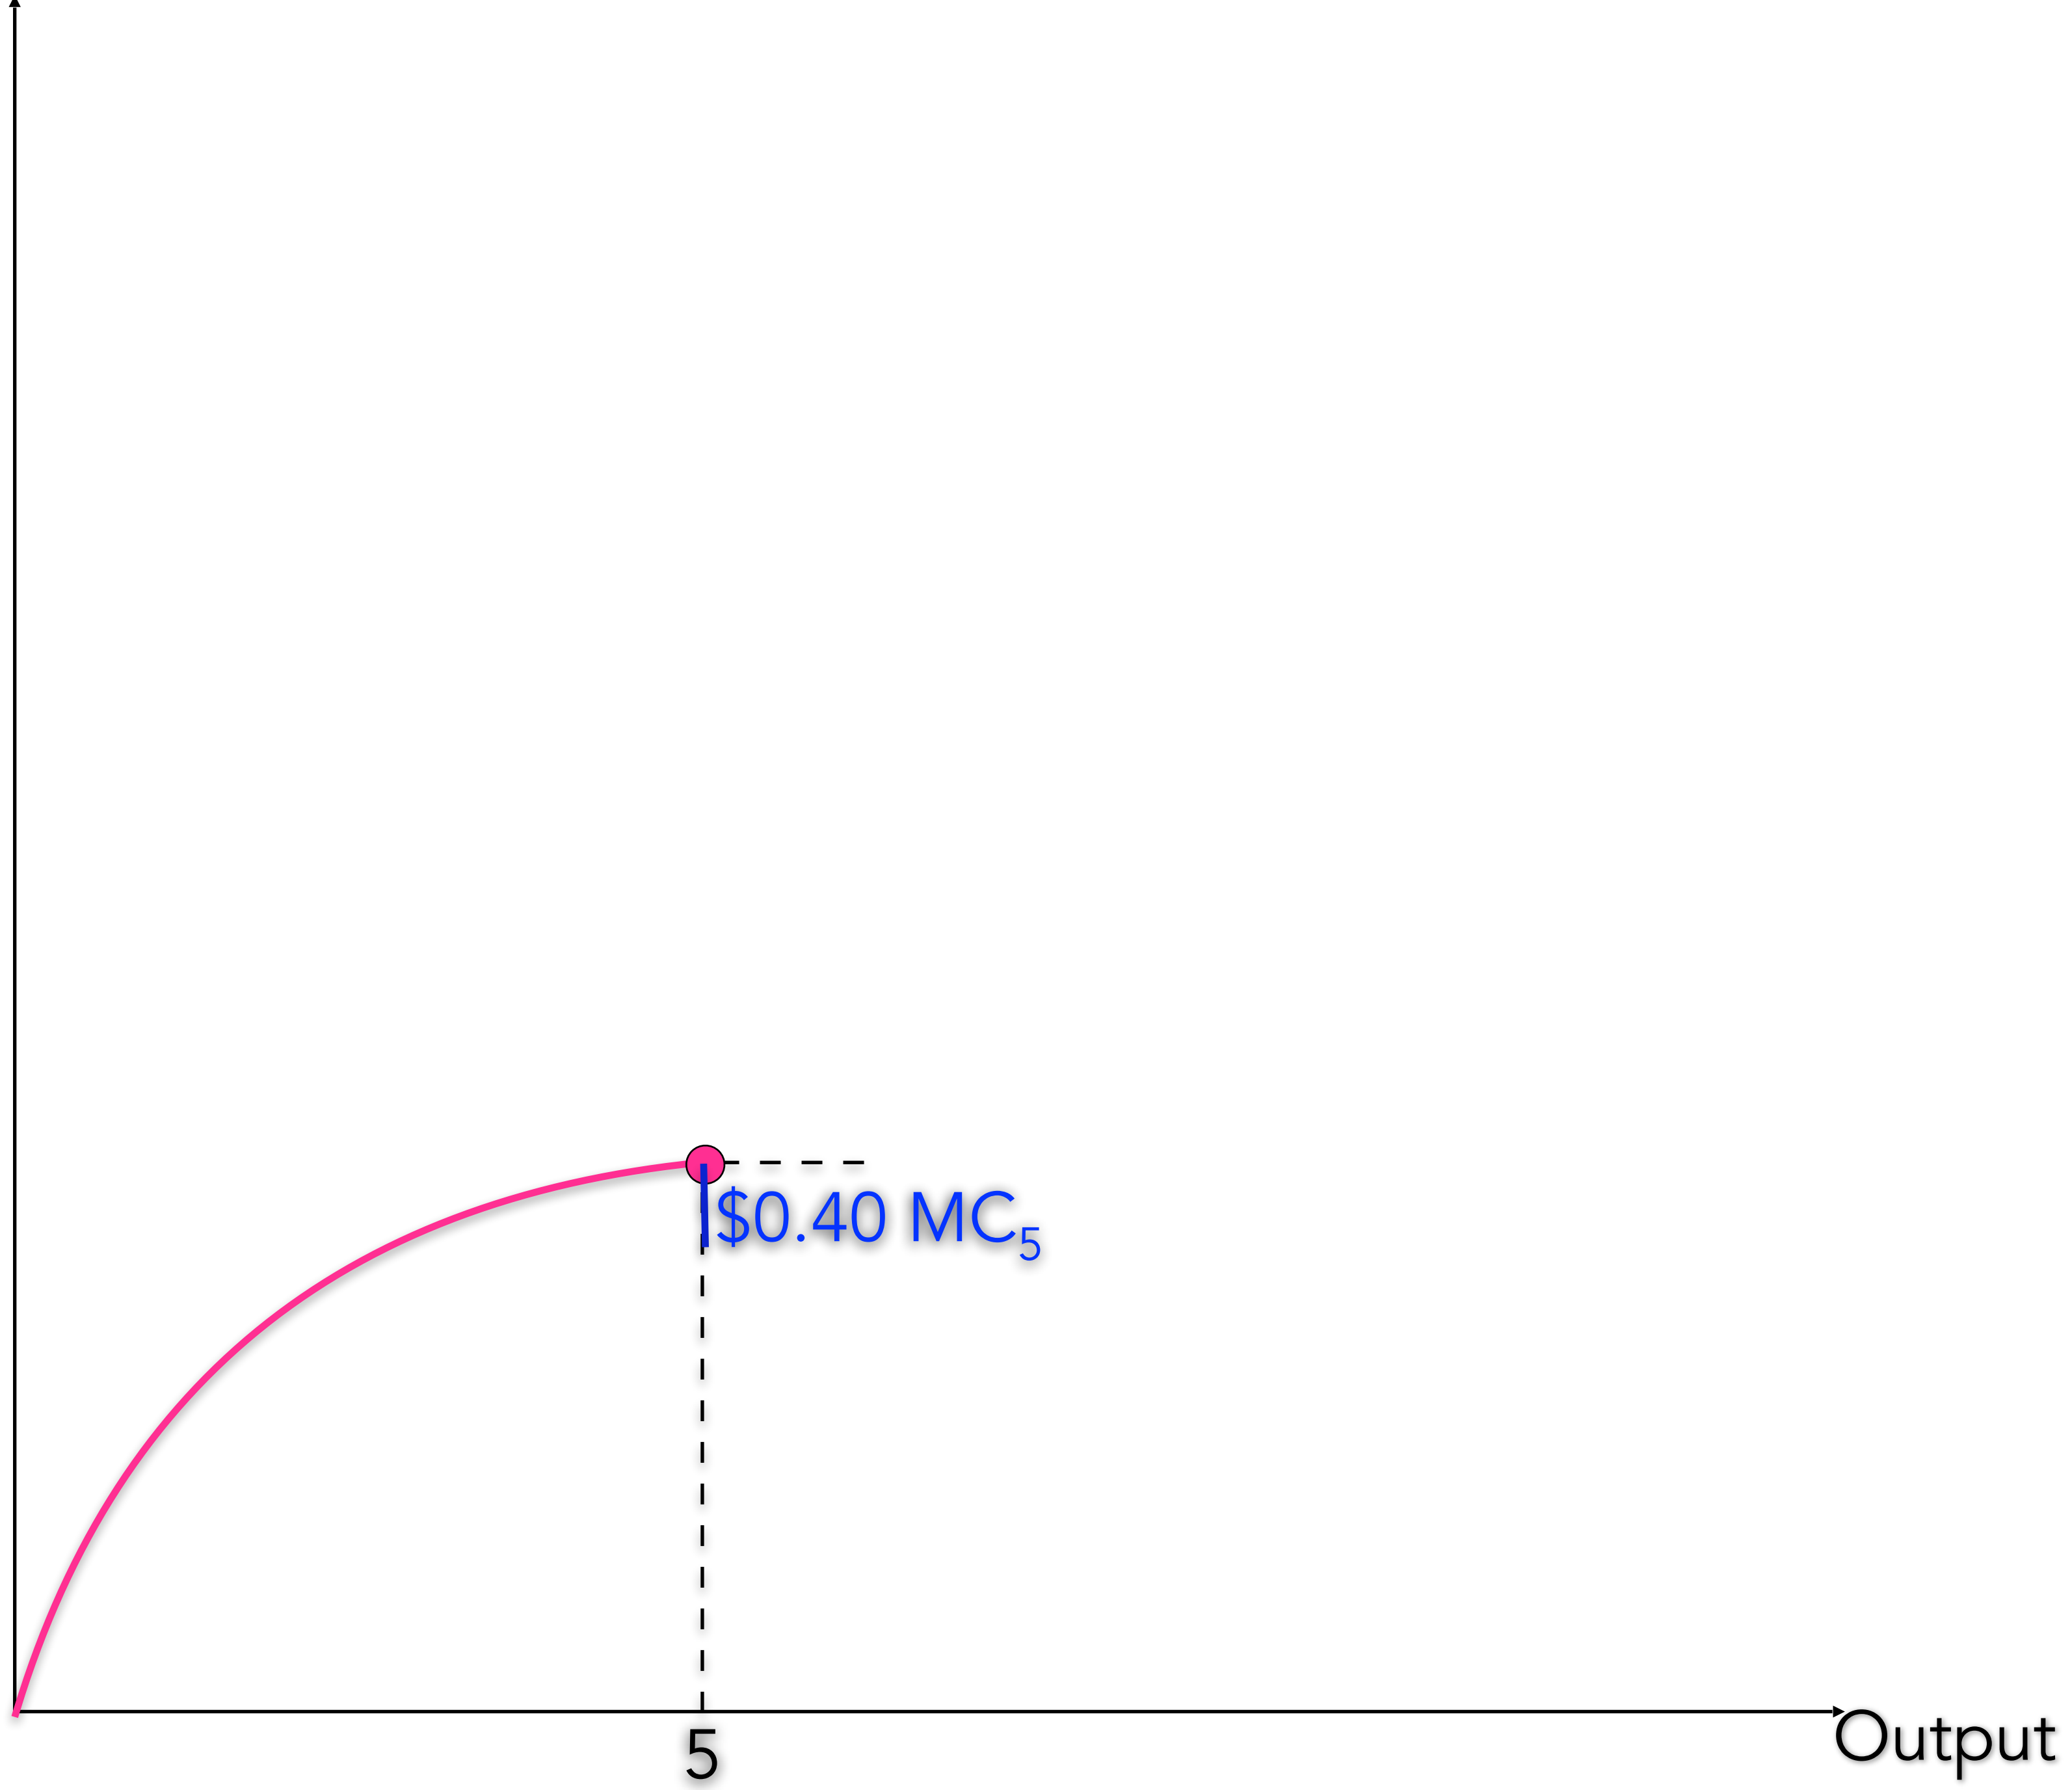

Marginal Cost

Variable Costs increase with decreasing Marginal Cost

Variable Cost

Output
