

For all exercises, you must read or calculate 7 different costs from one graph

AVC

Read: ATC, MC, AVC, AFC

ATC

MC

Calculate: TC , VC , FC

$$VC = 10 \times 100 = 1,000$$

$$TC = 15 \times 100 = 1,500$$

Q

=

1

0

0

AVC=10

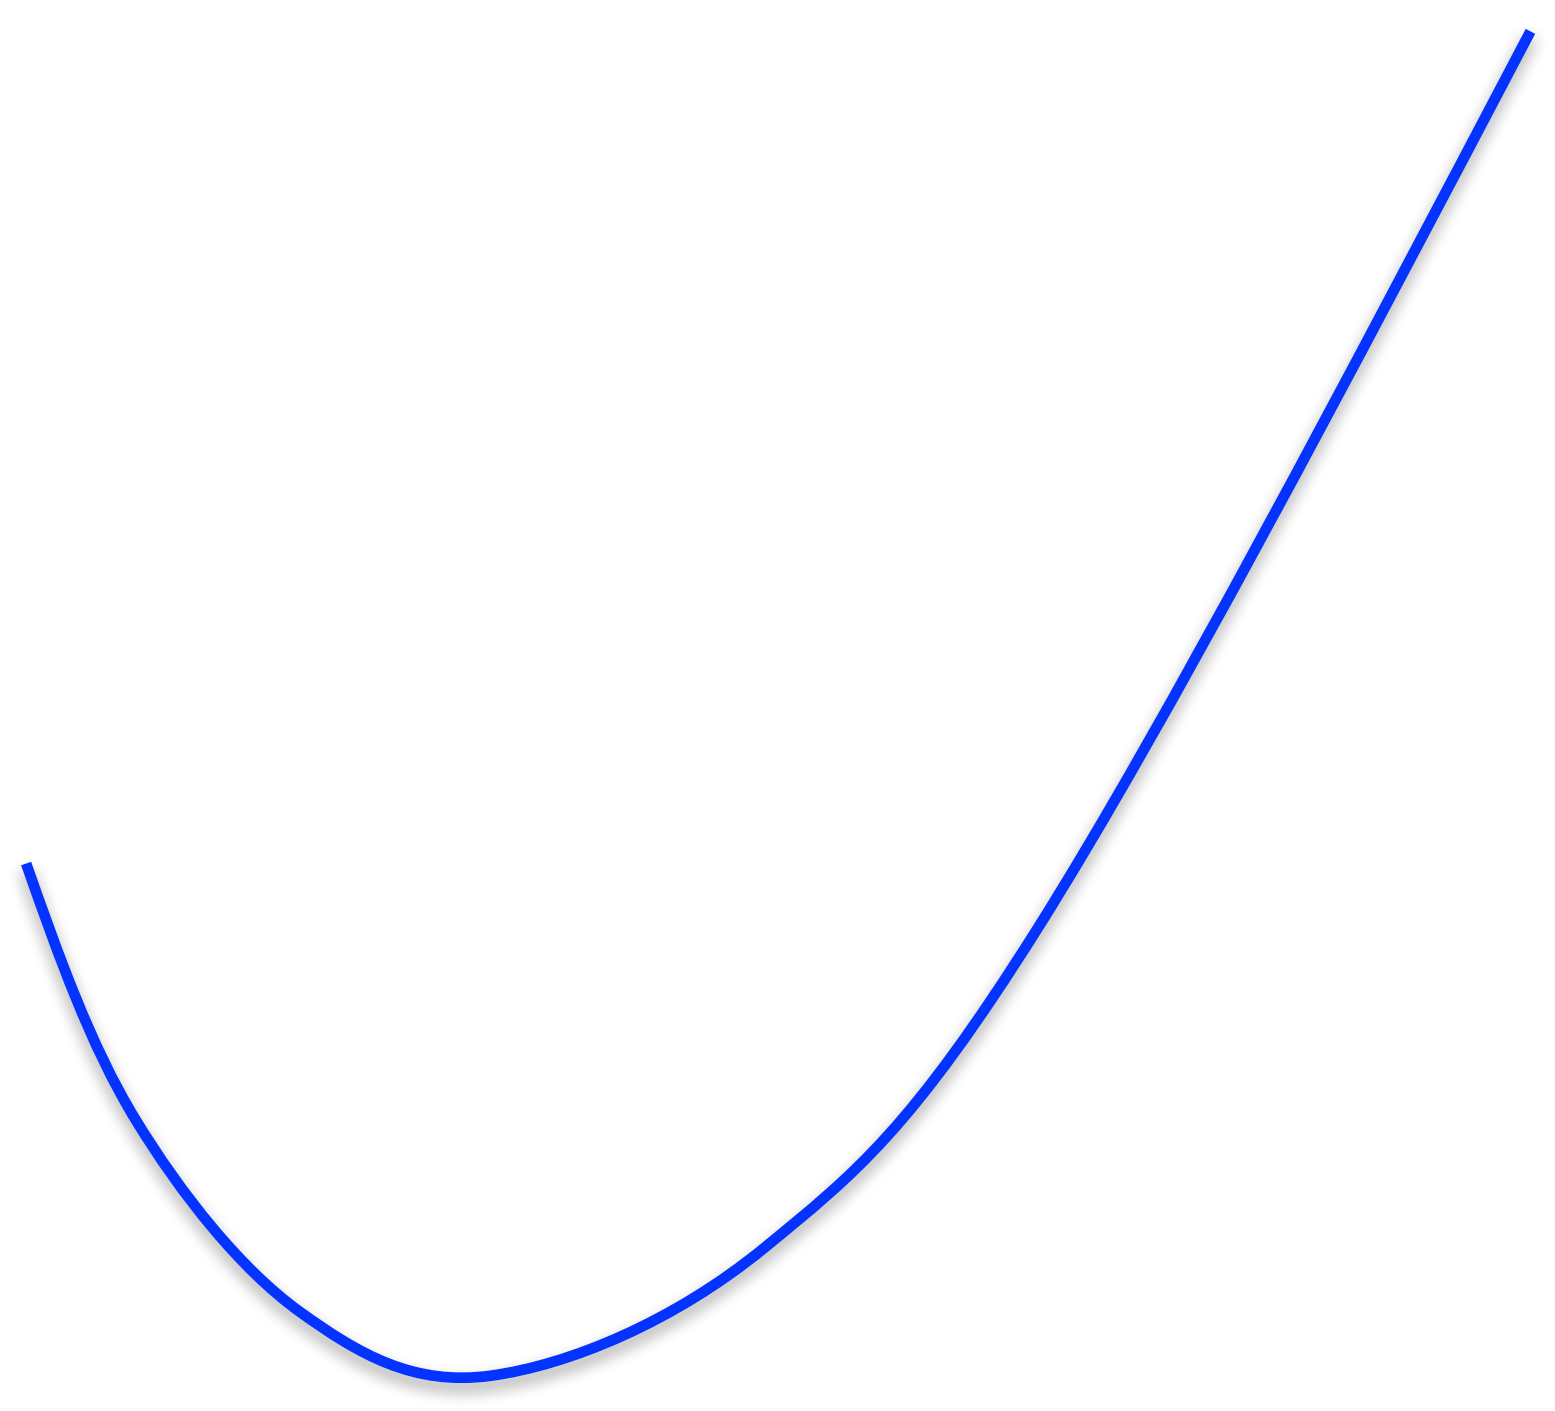

ATC \equiv 15

$$\text{AFC} = 15 - 10 = 5$$

$$FC = 5 \times 100 = 500$$

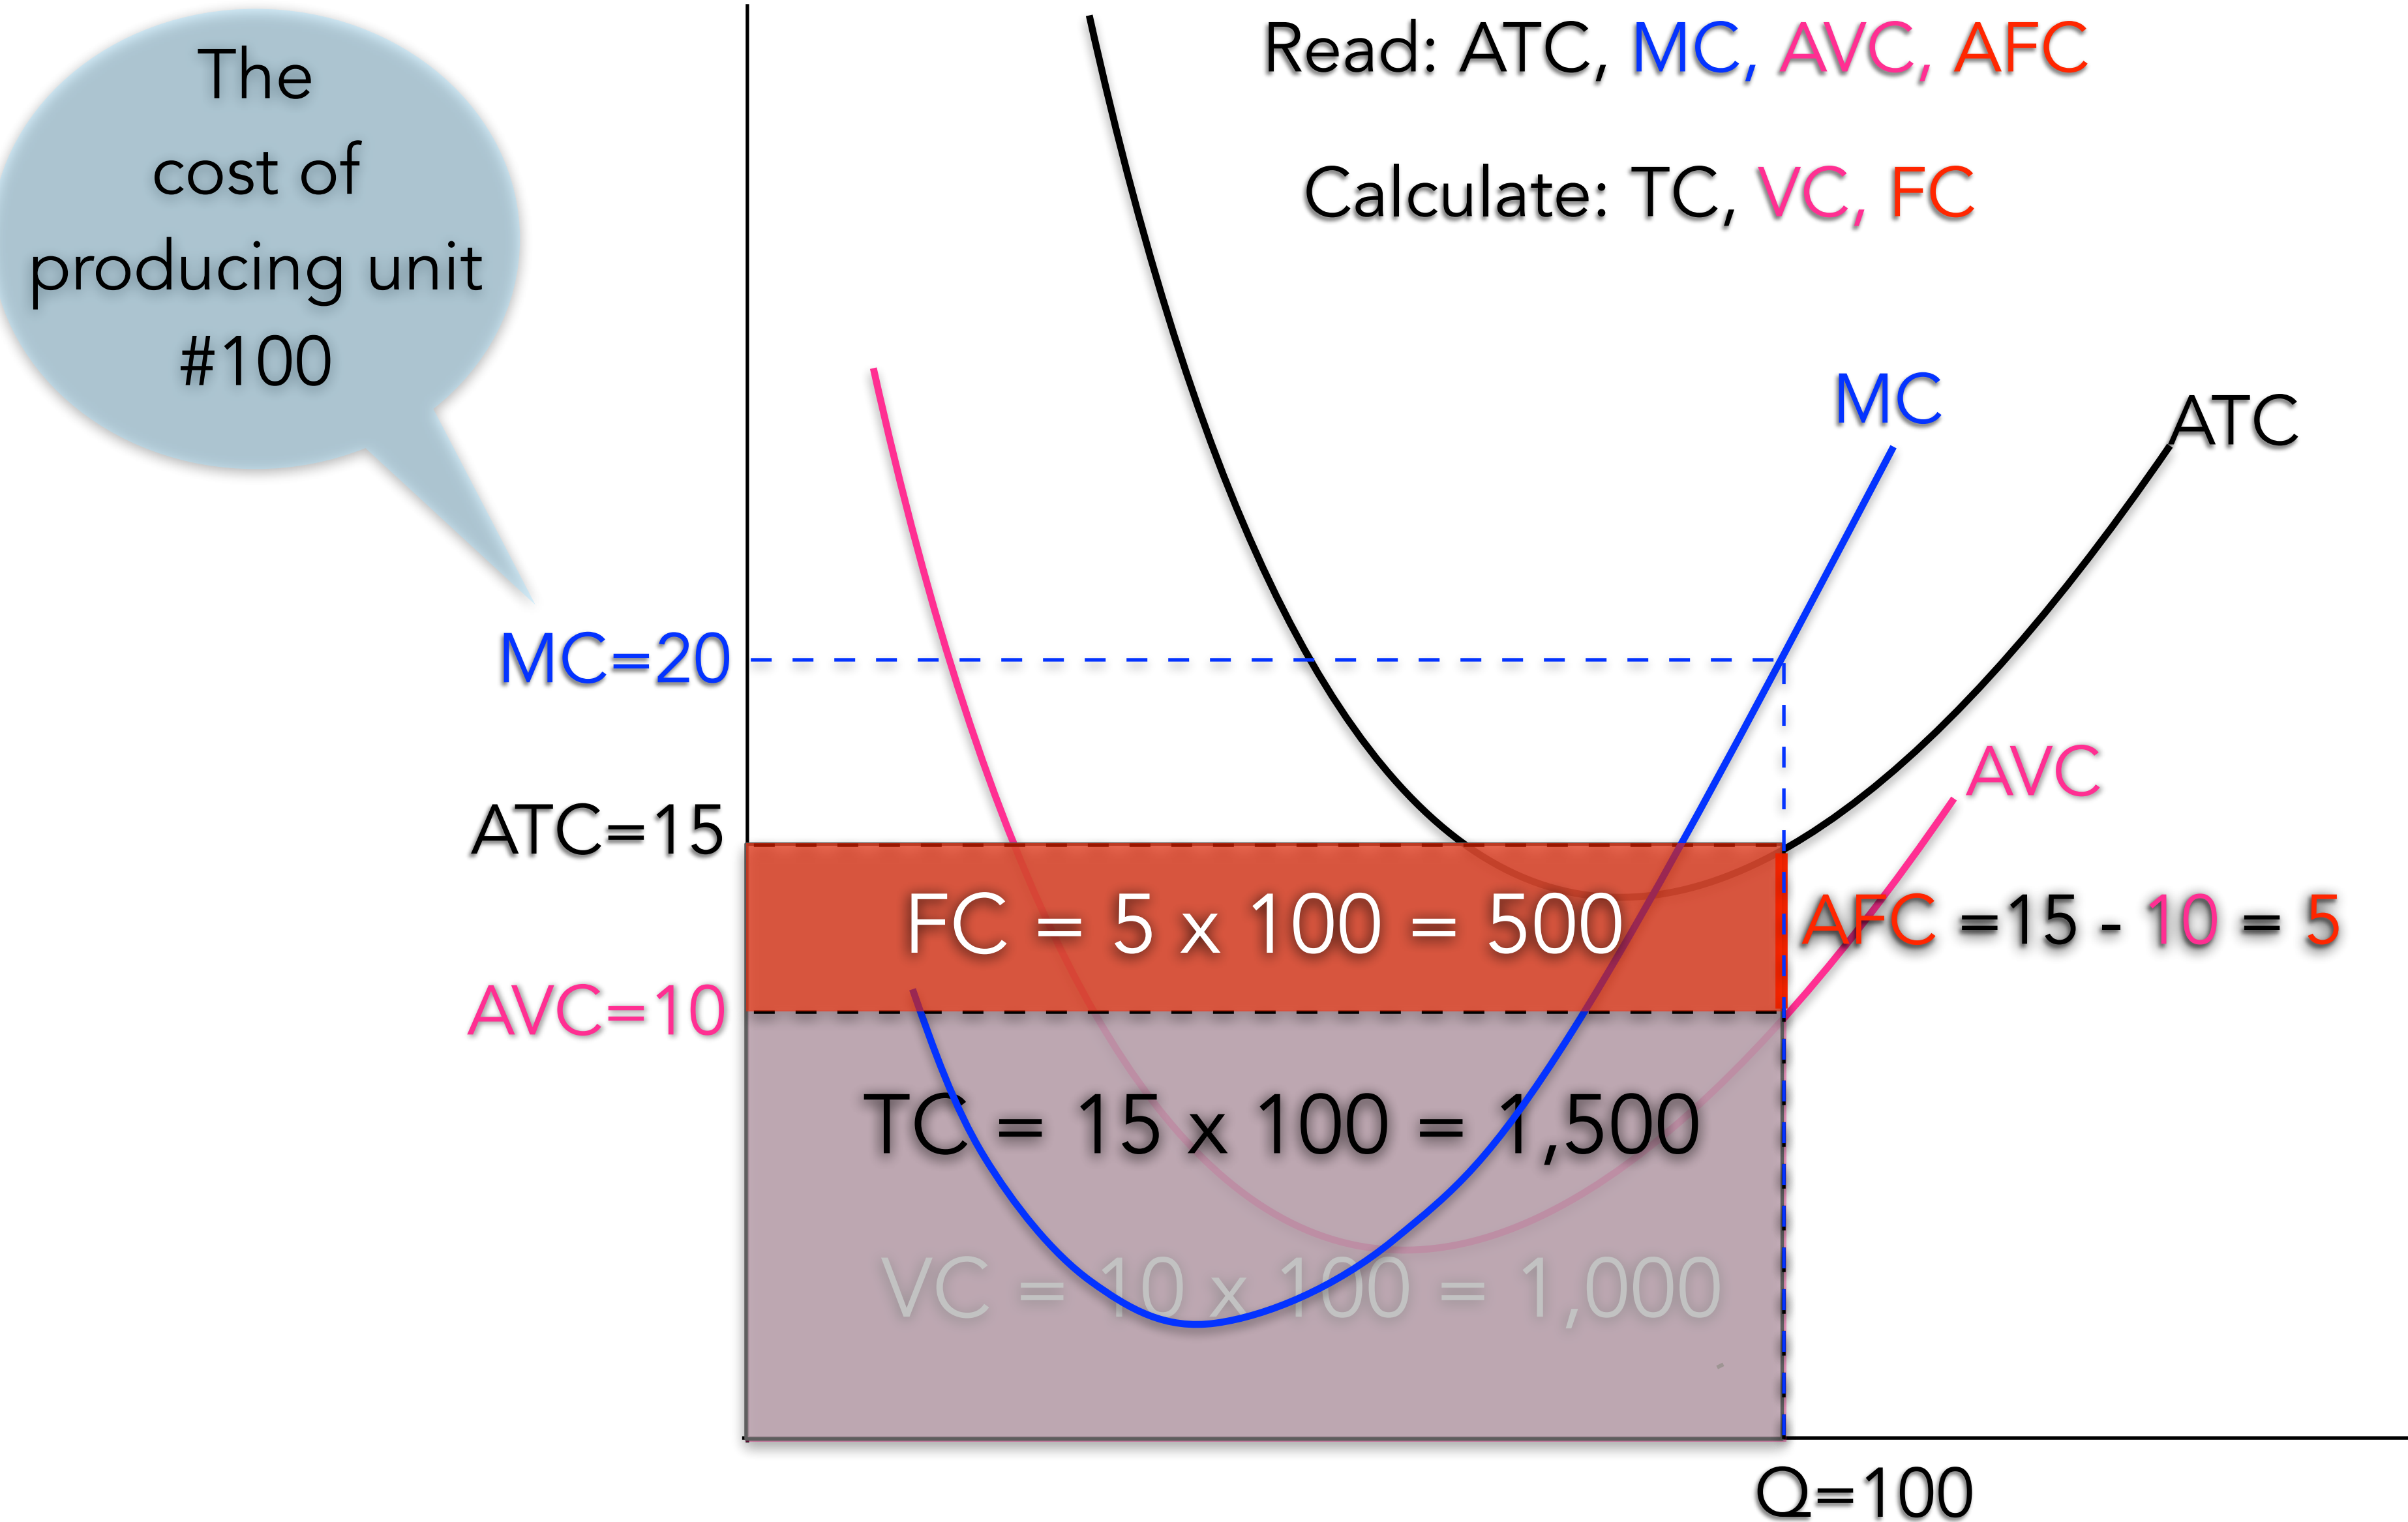

MC = 20

The
cost of
producing unit
#100

For all exercises, you **must read or calculate 7** different costs from one graph

Reading Cost Curves
