

Moving into a larger Plant

Allows the use of cost
reducing technology

The firm gets more
output out of the same
amount of inputs

Example: Twice the number of workers
produce four times the amount of output

Example: **Three** times
the number of workers
produce **four** times
the amount of output

Example: **Twice** the number of workers
produce **four** times the amount of output

Moving into a larger Plant

The firm gets more
output out of the same
amount of inputs

Allows the use of cost
reducing technology

Example: **Three** times
the number of workers
