

For all exercises, you must read or calculate 7 different costs from one graph

AVC

Read: ATC, MC, AVC, AFC

ATC

MC

Calculate: TC , VC , FC

$$AVC \times Q = VC$$

AVC

ATC

$$ATC \times Q = TC$$

$$AFC \times Q = FC$$

AFC =

ATC - AVC

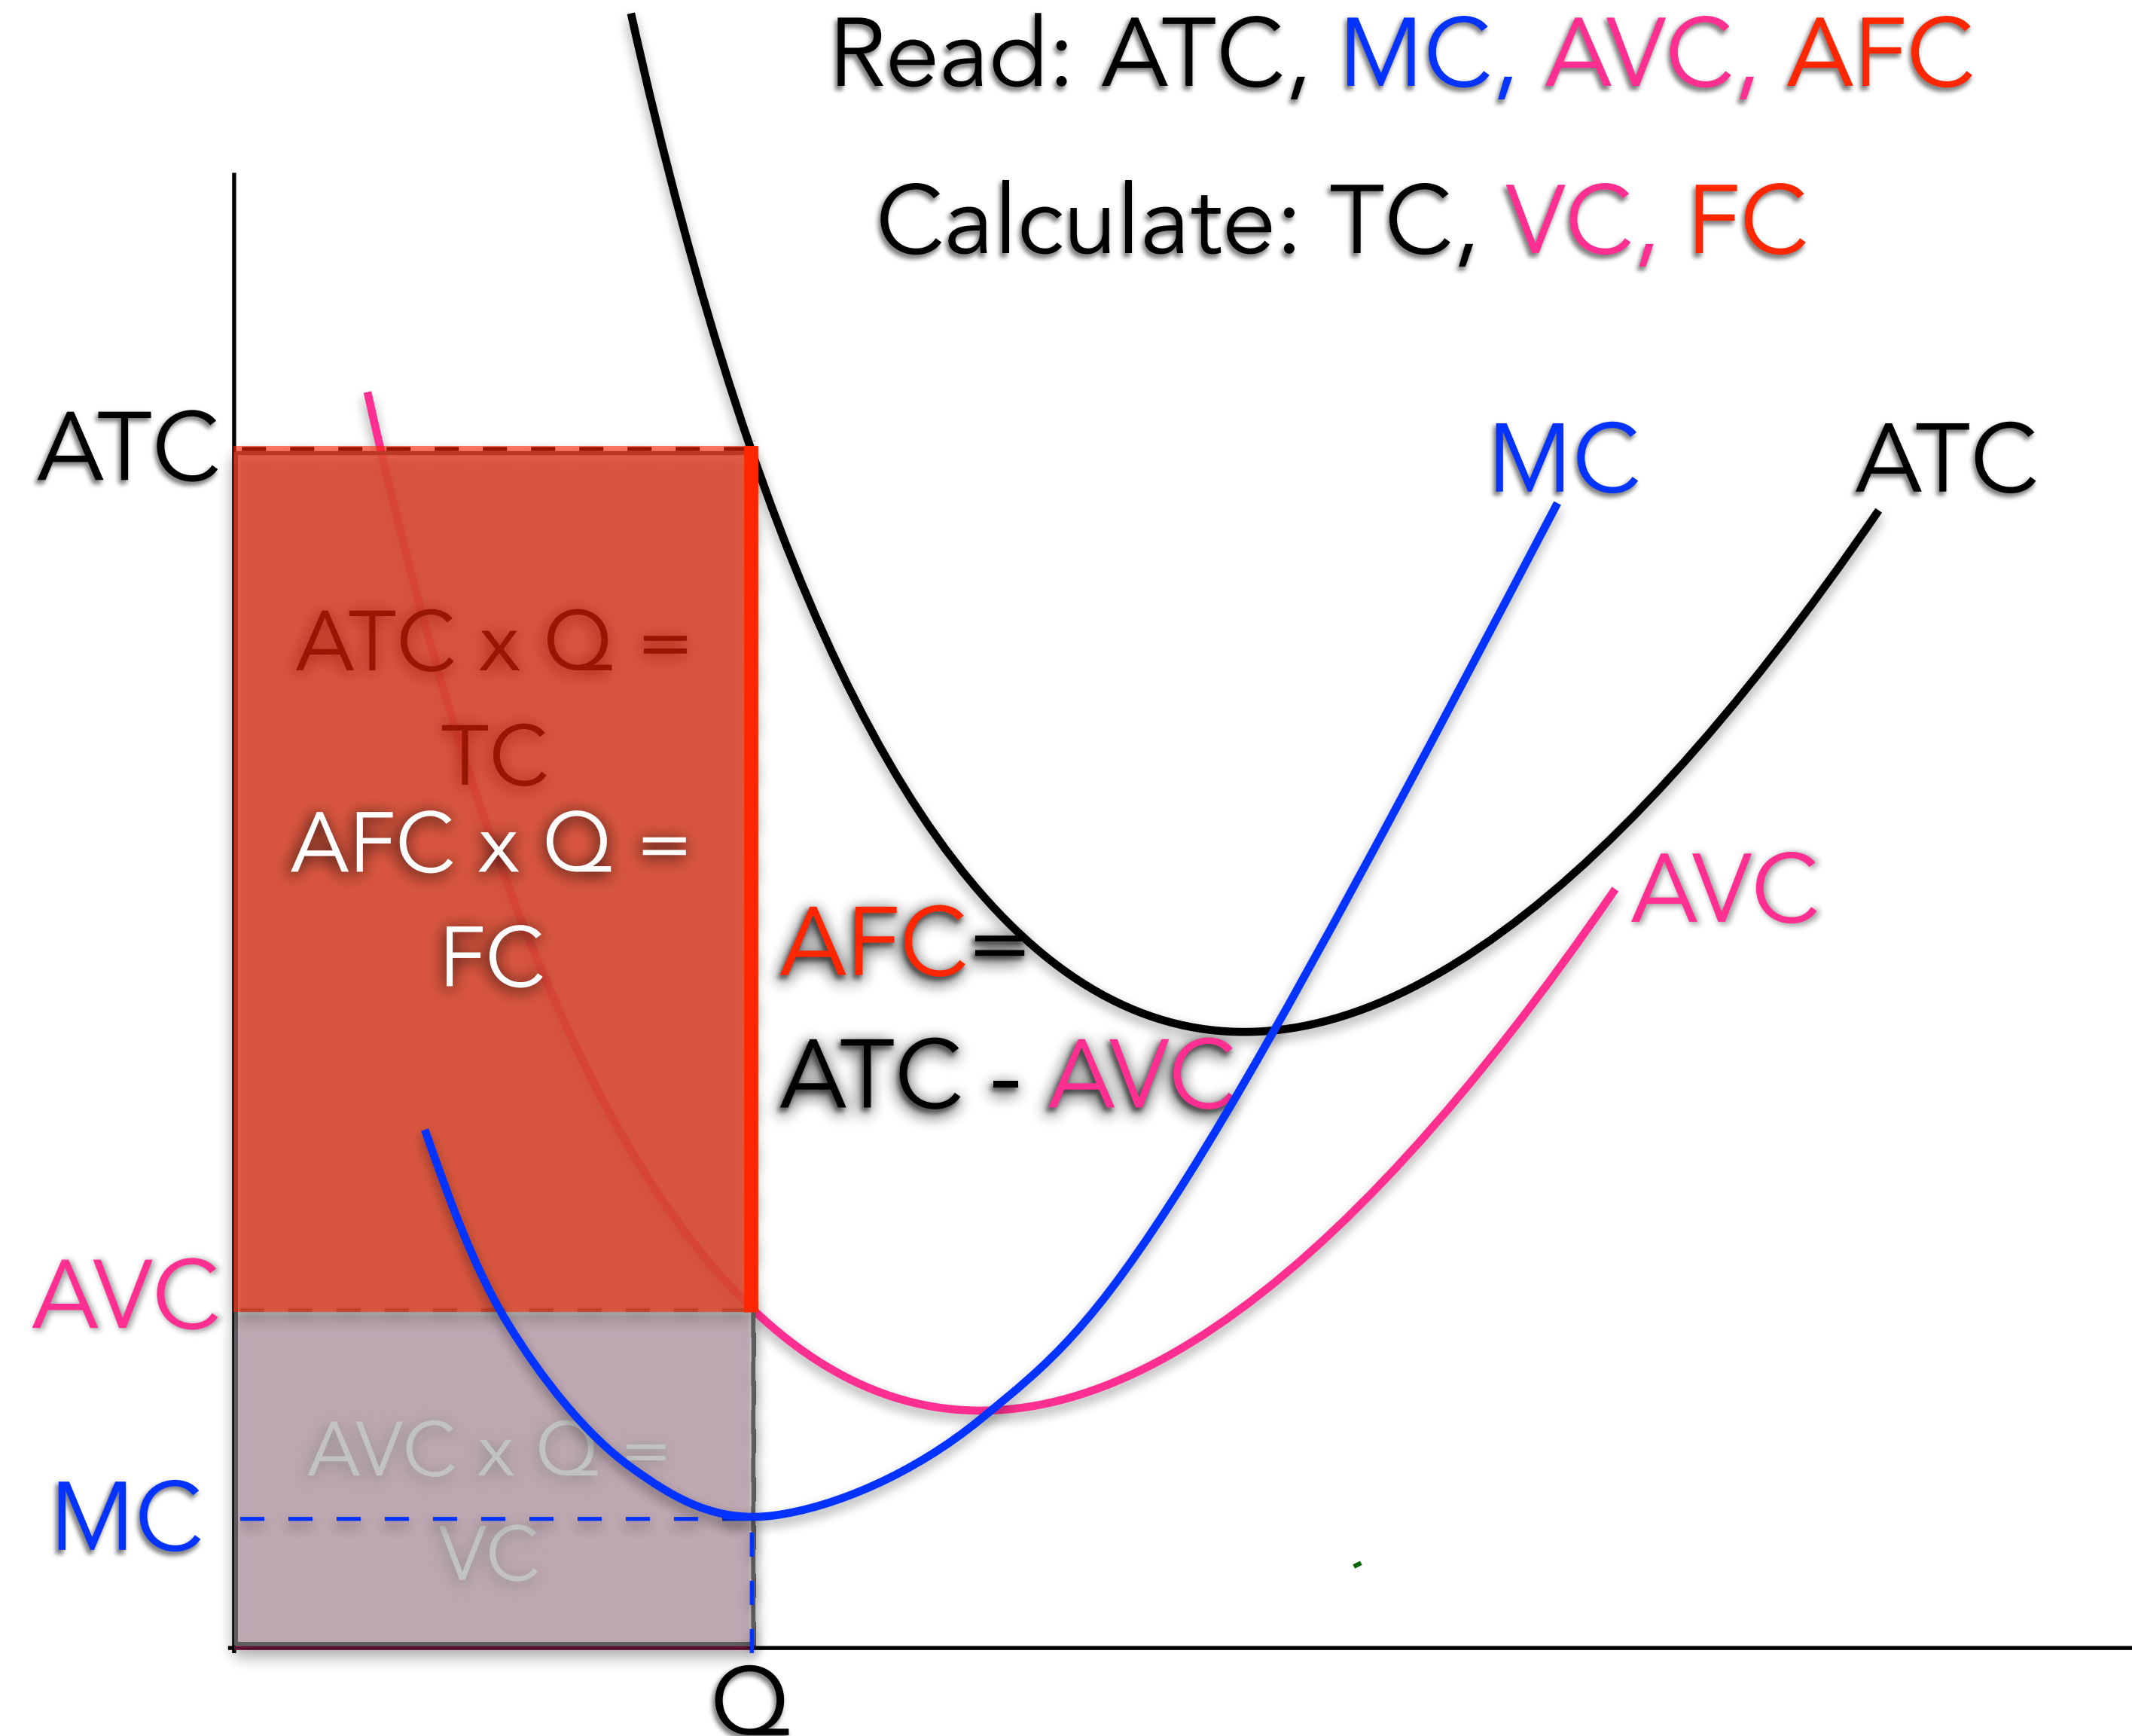

MC

For all exercises, you **must read or calculate 7** different costs from one graph

For all exercises, you must read or calculate 7 different costs from one graph
