

A

E

Equilibrium GDP:

6,000

Equilibrium

AEo

Potential GDP

To eliminate a
recessionary gap,
AE must rise.

AE₁

To increase AE: we
need C, I, G, Tr or
NX to increase

Equilibrium =

Government Policy

To **increase C**: Decrease Taxes or Increase Transfers

To **increase I**: Decrease interest rates

Government may **increase** spending or

To **increase NX** make the dollar weaker

Potential

GDP : 7,000

Government Policy
