

Produce Surplus at Equilibrium

600

PS =

Triangle

25

Triangle Area = Base x Height x 1/2

600

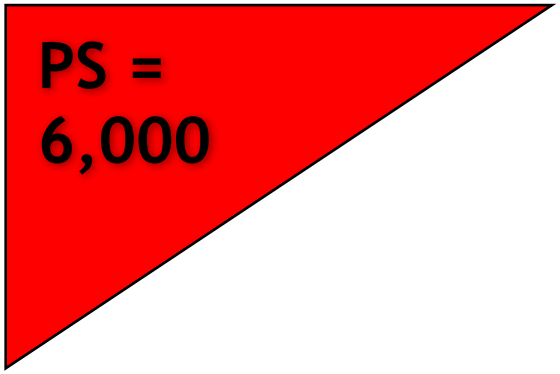

25-5

$$\text{Triangle Area} = 600 \times (25 - 5) \times 1/2$$

$$PS = 6000 \times (20) \times \frac{1}{2}$$

$$= 6,000$$

A red pennant (a triangular flag) with a black border. The text "PS =" is on the top line and "6,000" is on the bottom line, both in a large, bold, black sans-serif font.

PS =
6,000

Producer Surplus at Equilibrium

When Buyers do not like the Equilibrium Price because it's "too high"
