

# Subsidy

Tax

Ceiling: 2,200

$$Q^s=300$$

3,900

3,900

2,200

$$Q^s=300$$

Ceiling has the same effect of imposing a tax on producers and a subsidy to consumers

The size of this **Tax** to producers and  
**Subsidy** to Consumers is this area:

Tax

# Subsidy

~~Tax~~/Subsidy =

$$(3,900 - 2,200) \times (300)$$

---

$$2$$

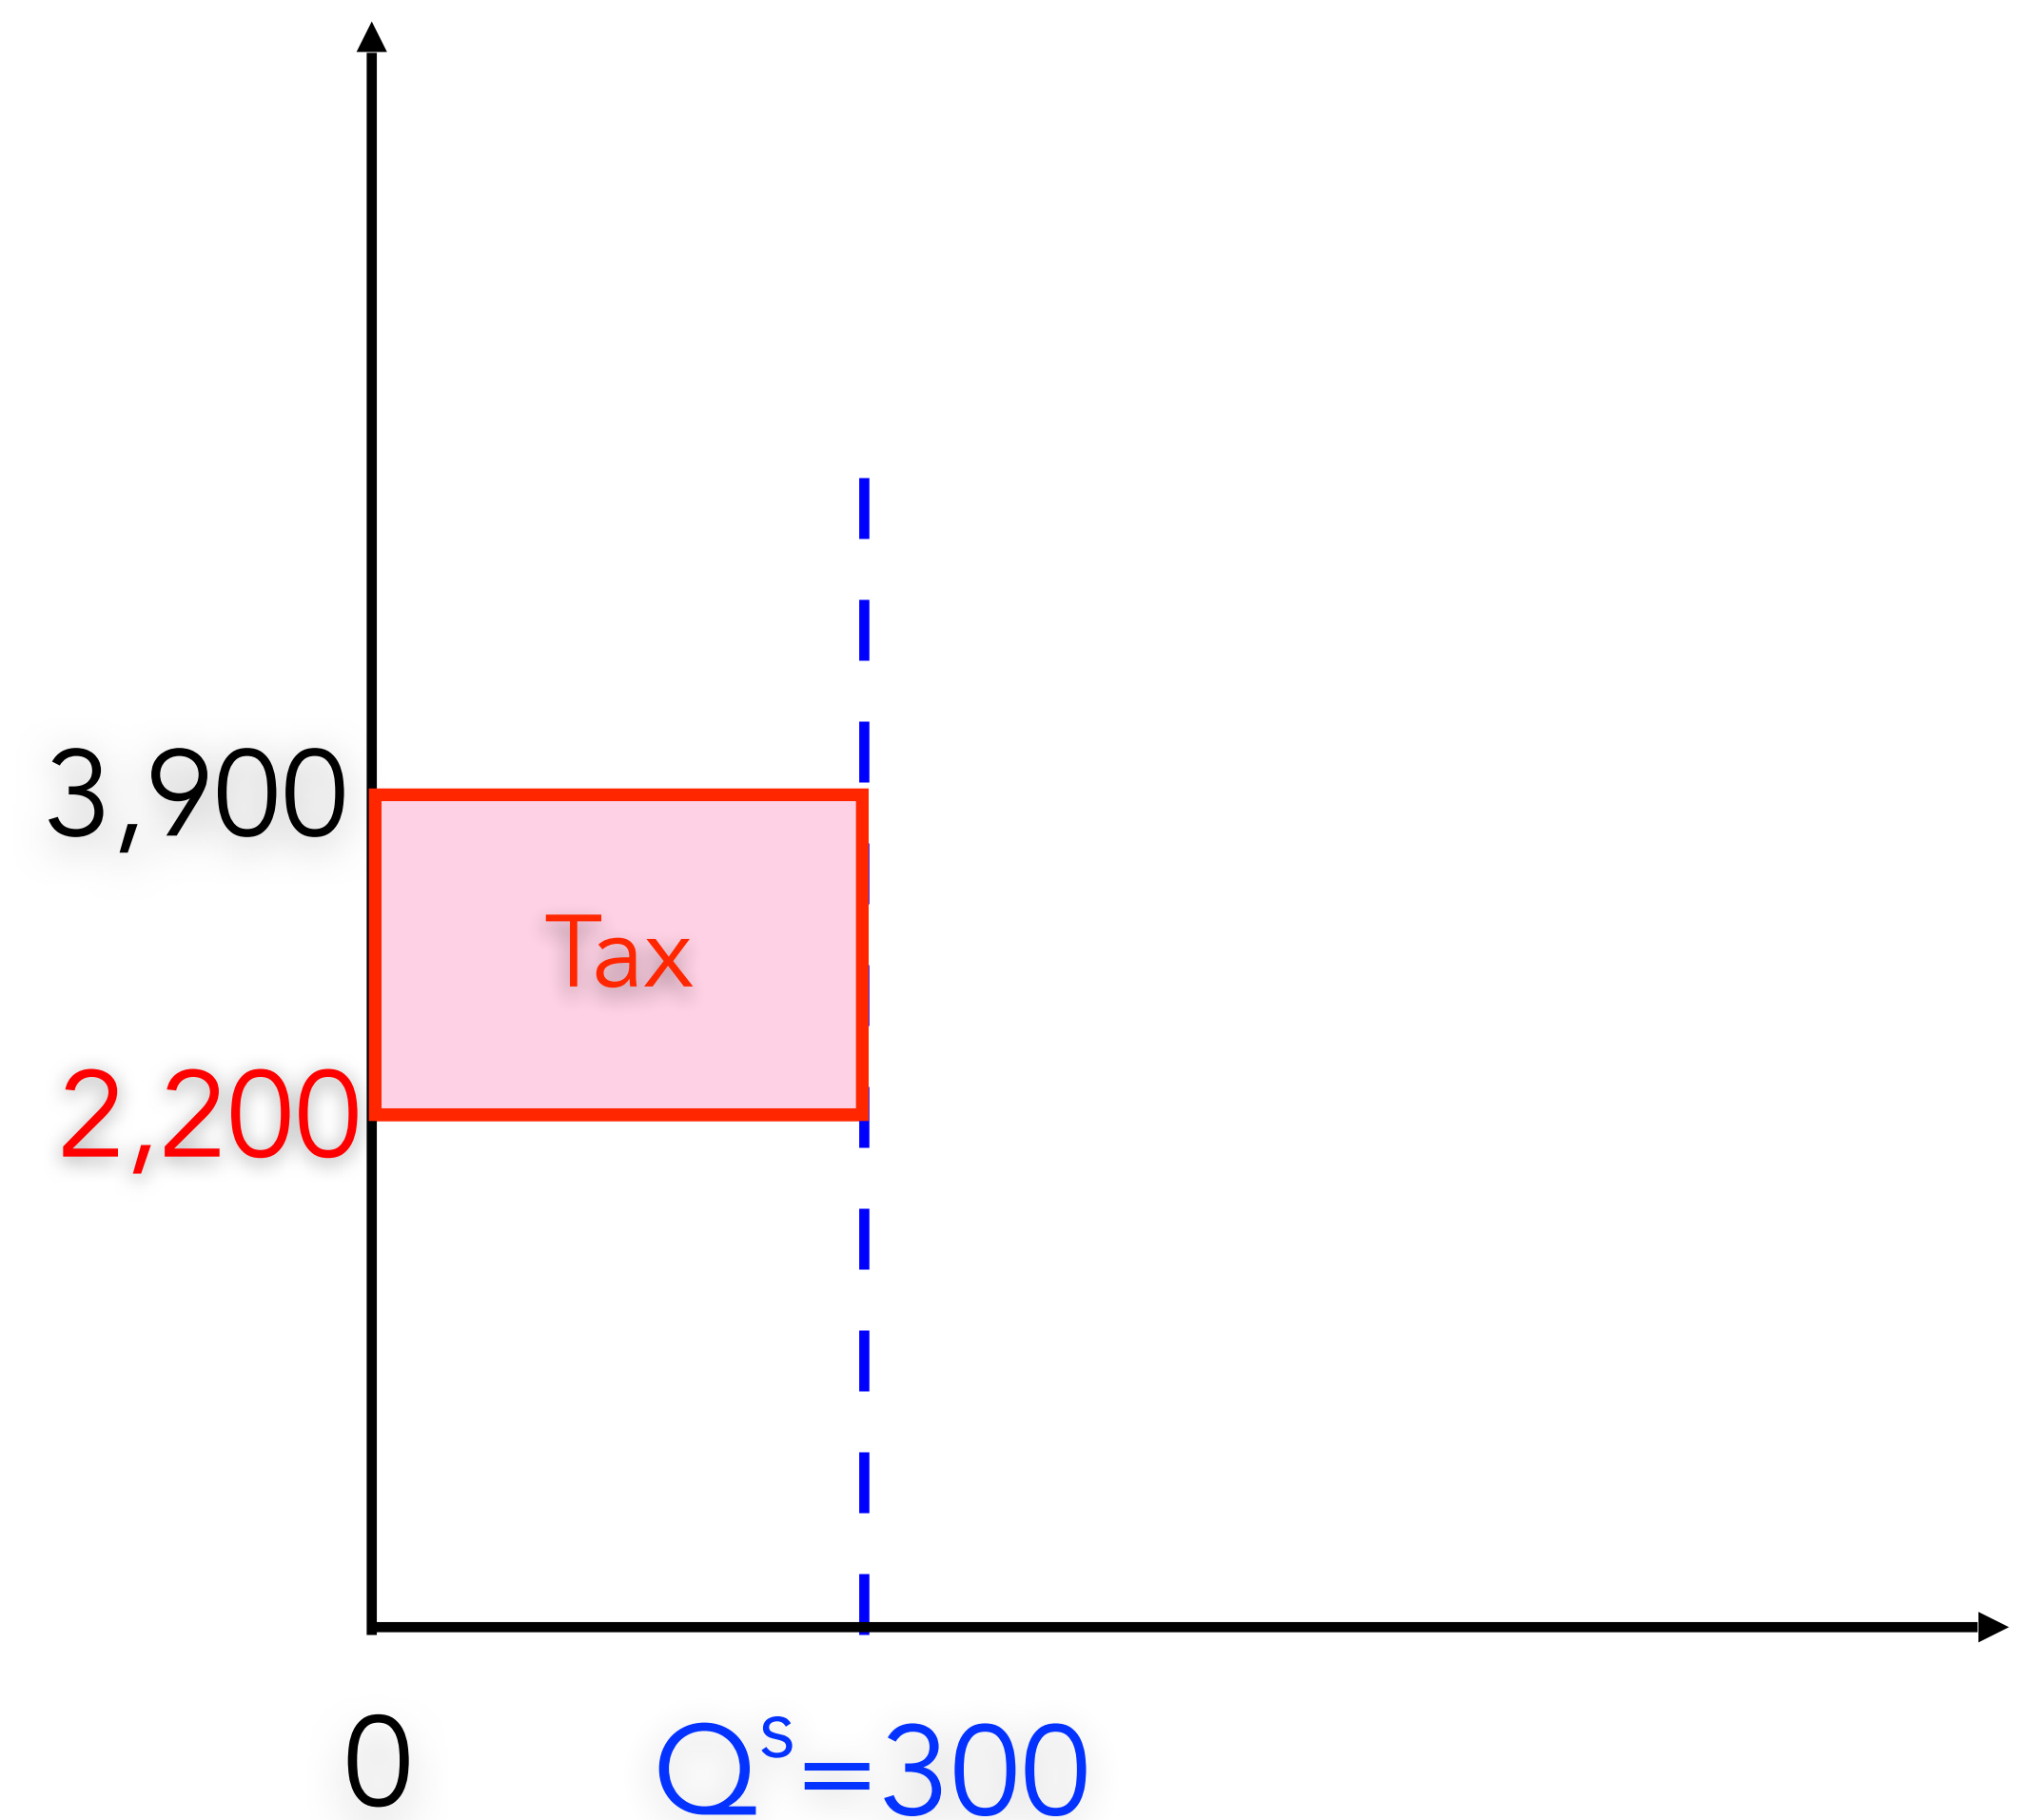

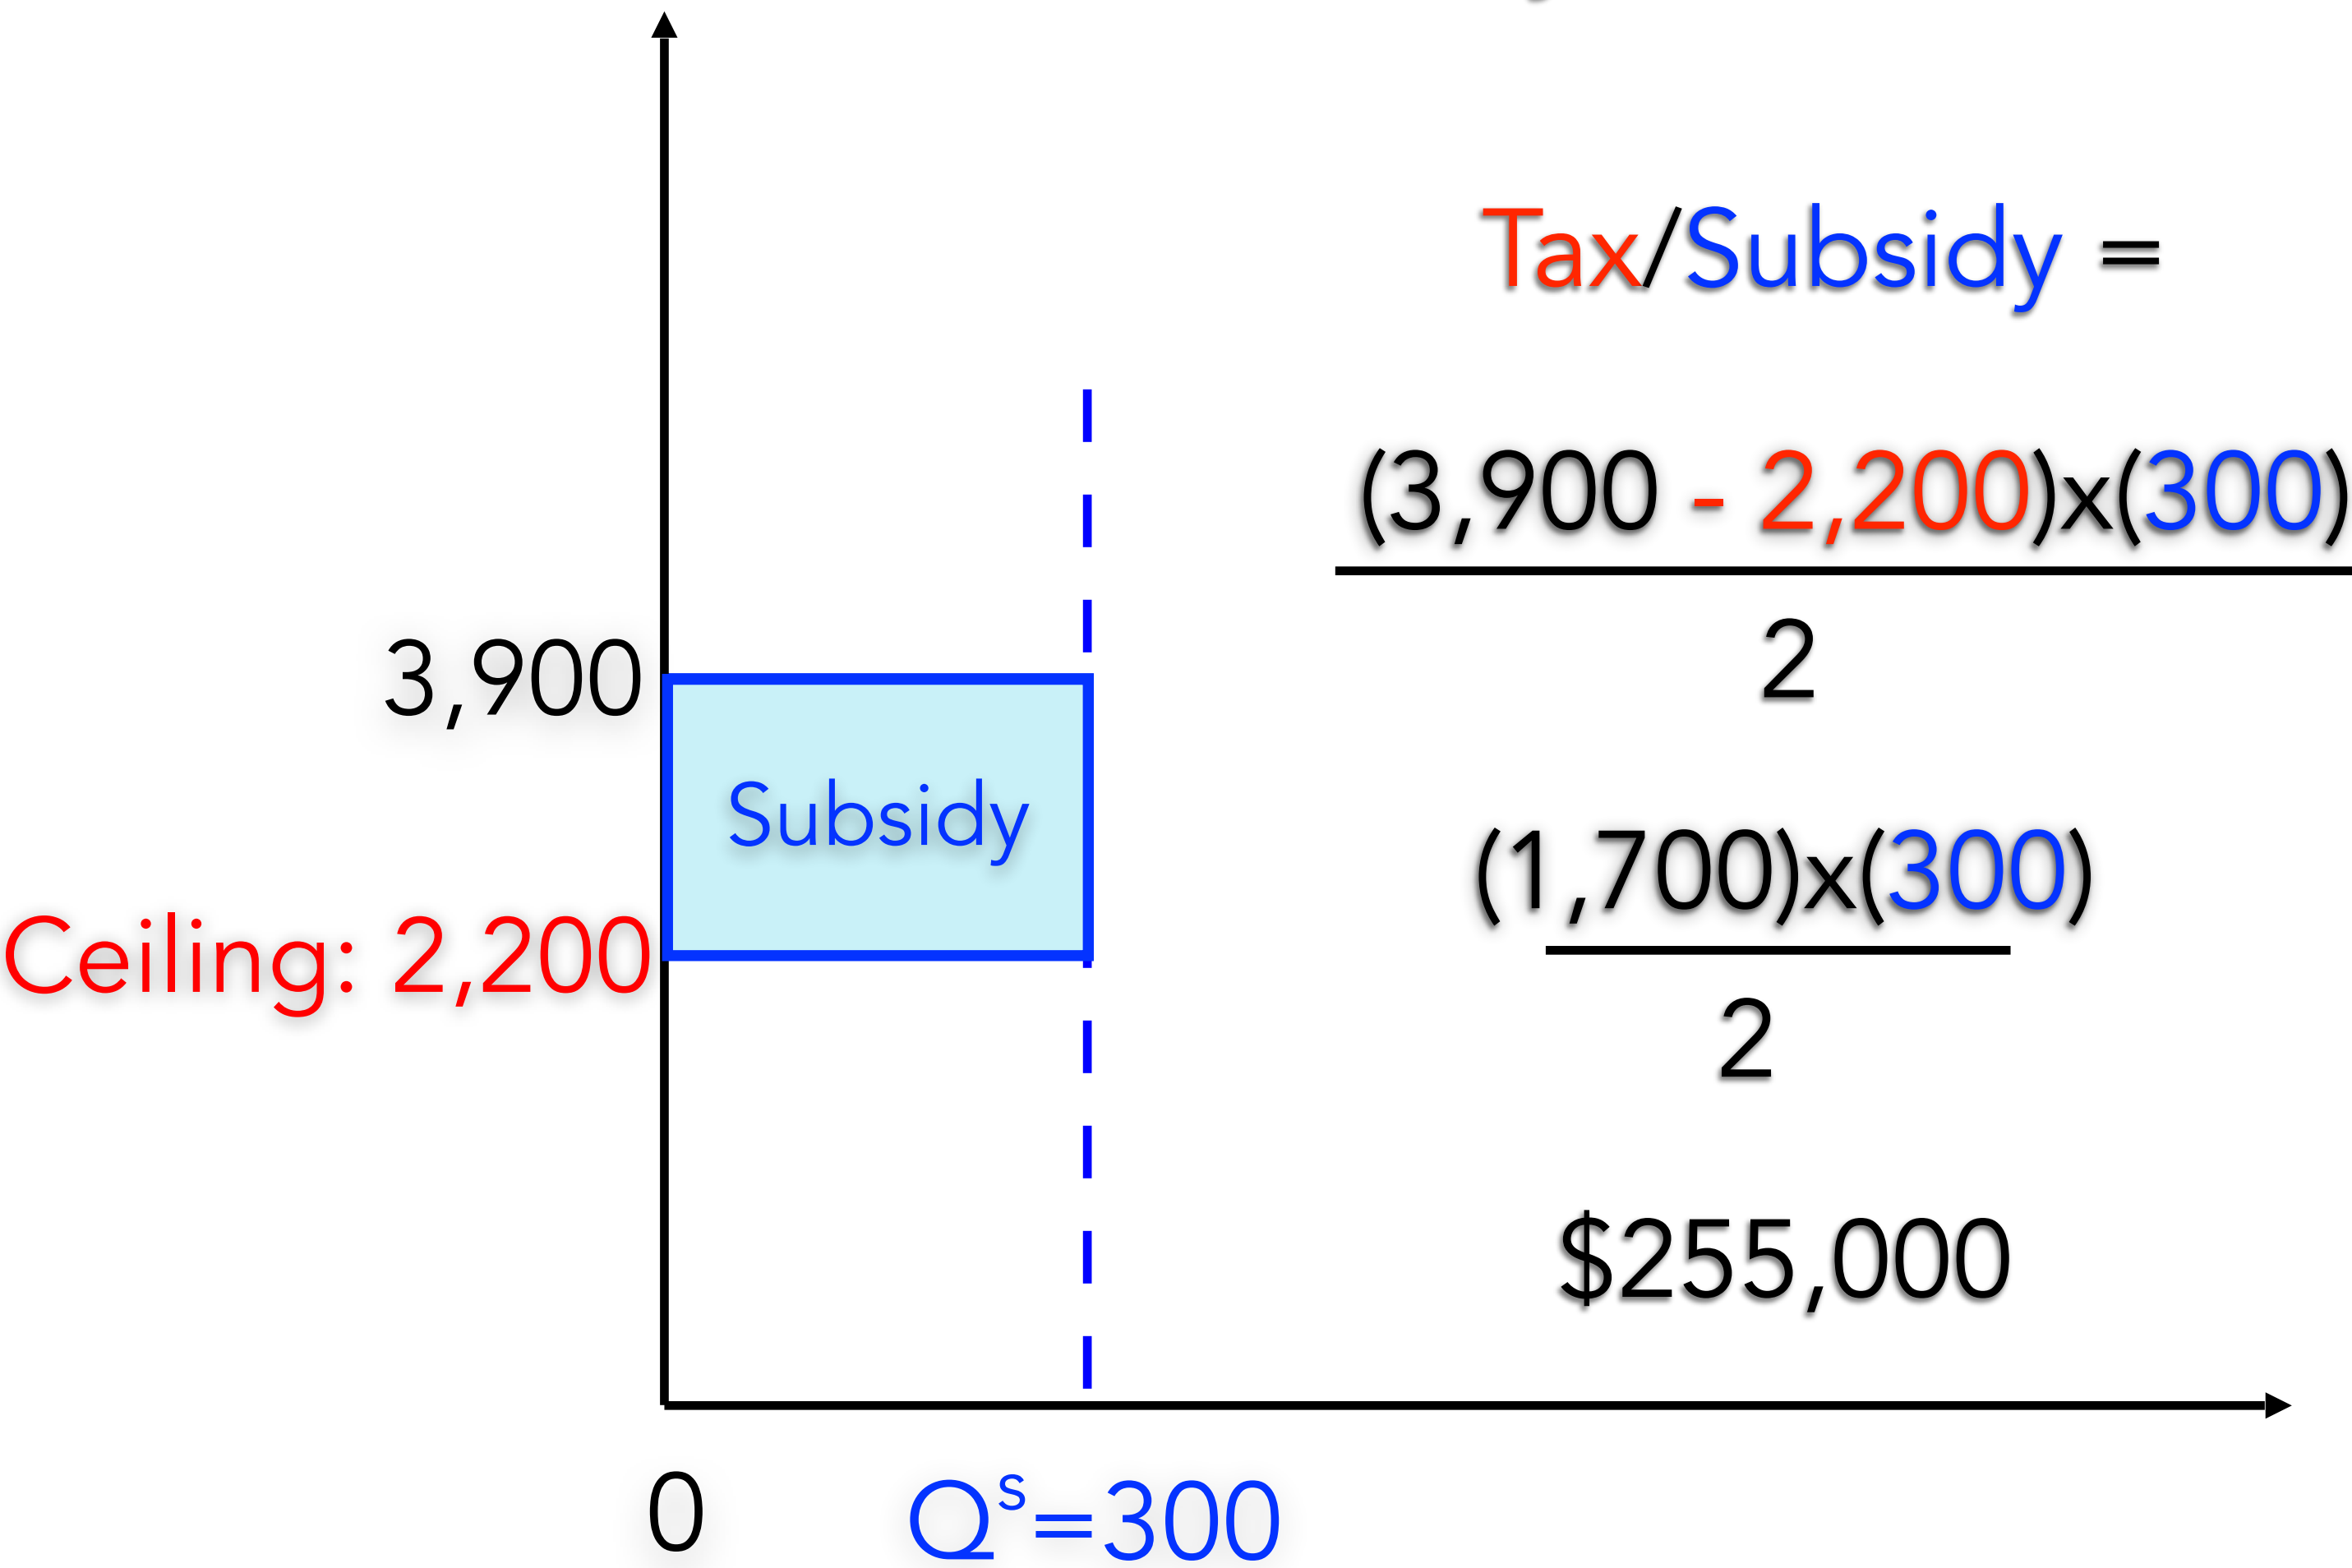

$$(1,700) \times (300)$$

---

$$2$$

**\$255,000**

The size of this **Tax** to producers and  
**Subsidy** to Consumers is this area:

# The imposition of a Ceiling (for example rent control)
