Consumer Surplus

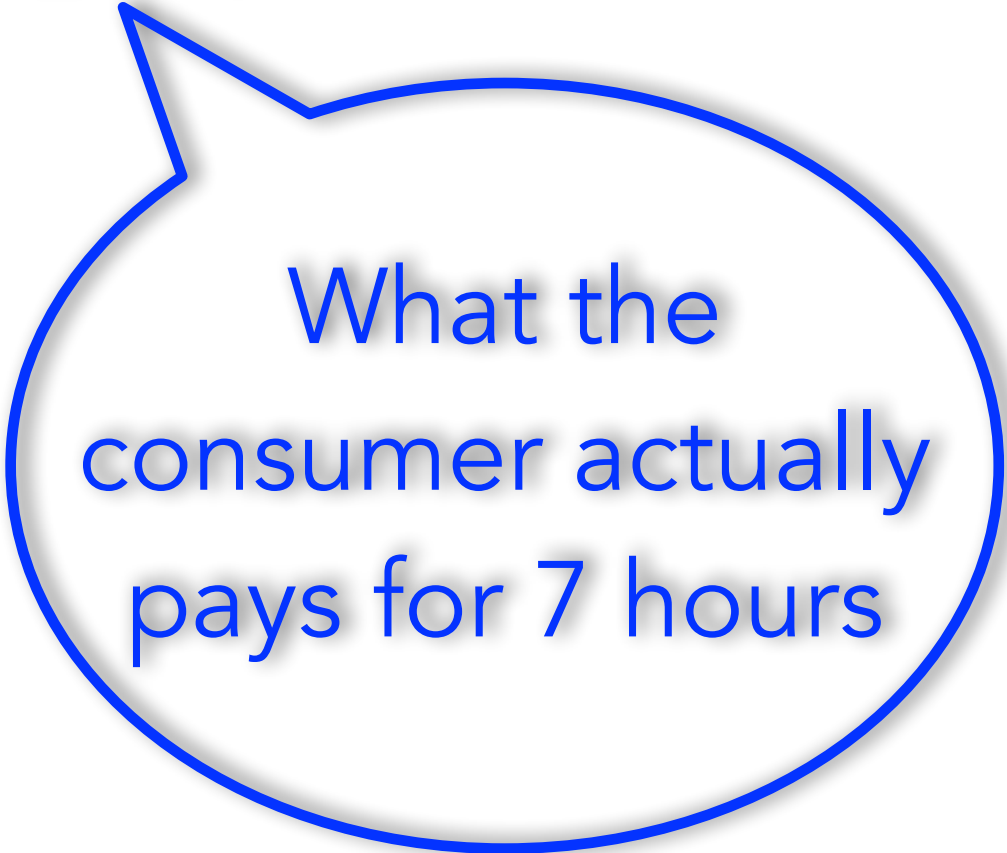

=

$$525 - 280 = 245$$

525

Value of 7
hours to
consumer

280

What the
consumer actually
pays for 7 hours

40

If the price is \$40
per unit

Willingness
to pay for 7
hours of cell
service =
\$525

The background is a solid orange color. A diagonal line runs from the top-left corner to the bottom-right corner, creating a white triangular area in the top-right corner.

\$525

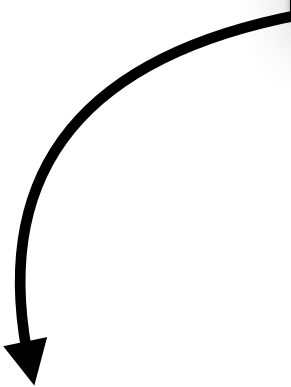

Consumer
Actually
pays $\$40 \times 7$

\$280

A large pink triangle pointing downwards, occupying the left half of the image. The right half of the image is white.

\$245

The difference between “value”
to the consumer and what s/he
actually pays is Consumer
Surplus

0

Consumer
buys 7 hours

Consumer Surplus

=

$$525 - 280 = 245$$

Value of 7
hours to
consumer

What the
consumer actually
pays for 7 hours
