S

At Potential GDP

Very low GDP  
(a Recession)

Below Potential GDP

Supply is vertical: firms  
increase prices but  
can't increase output

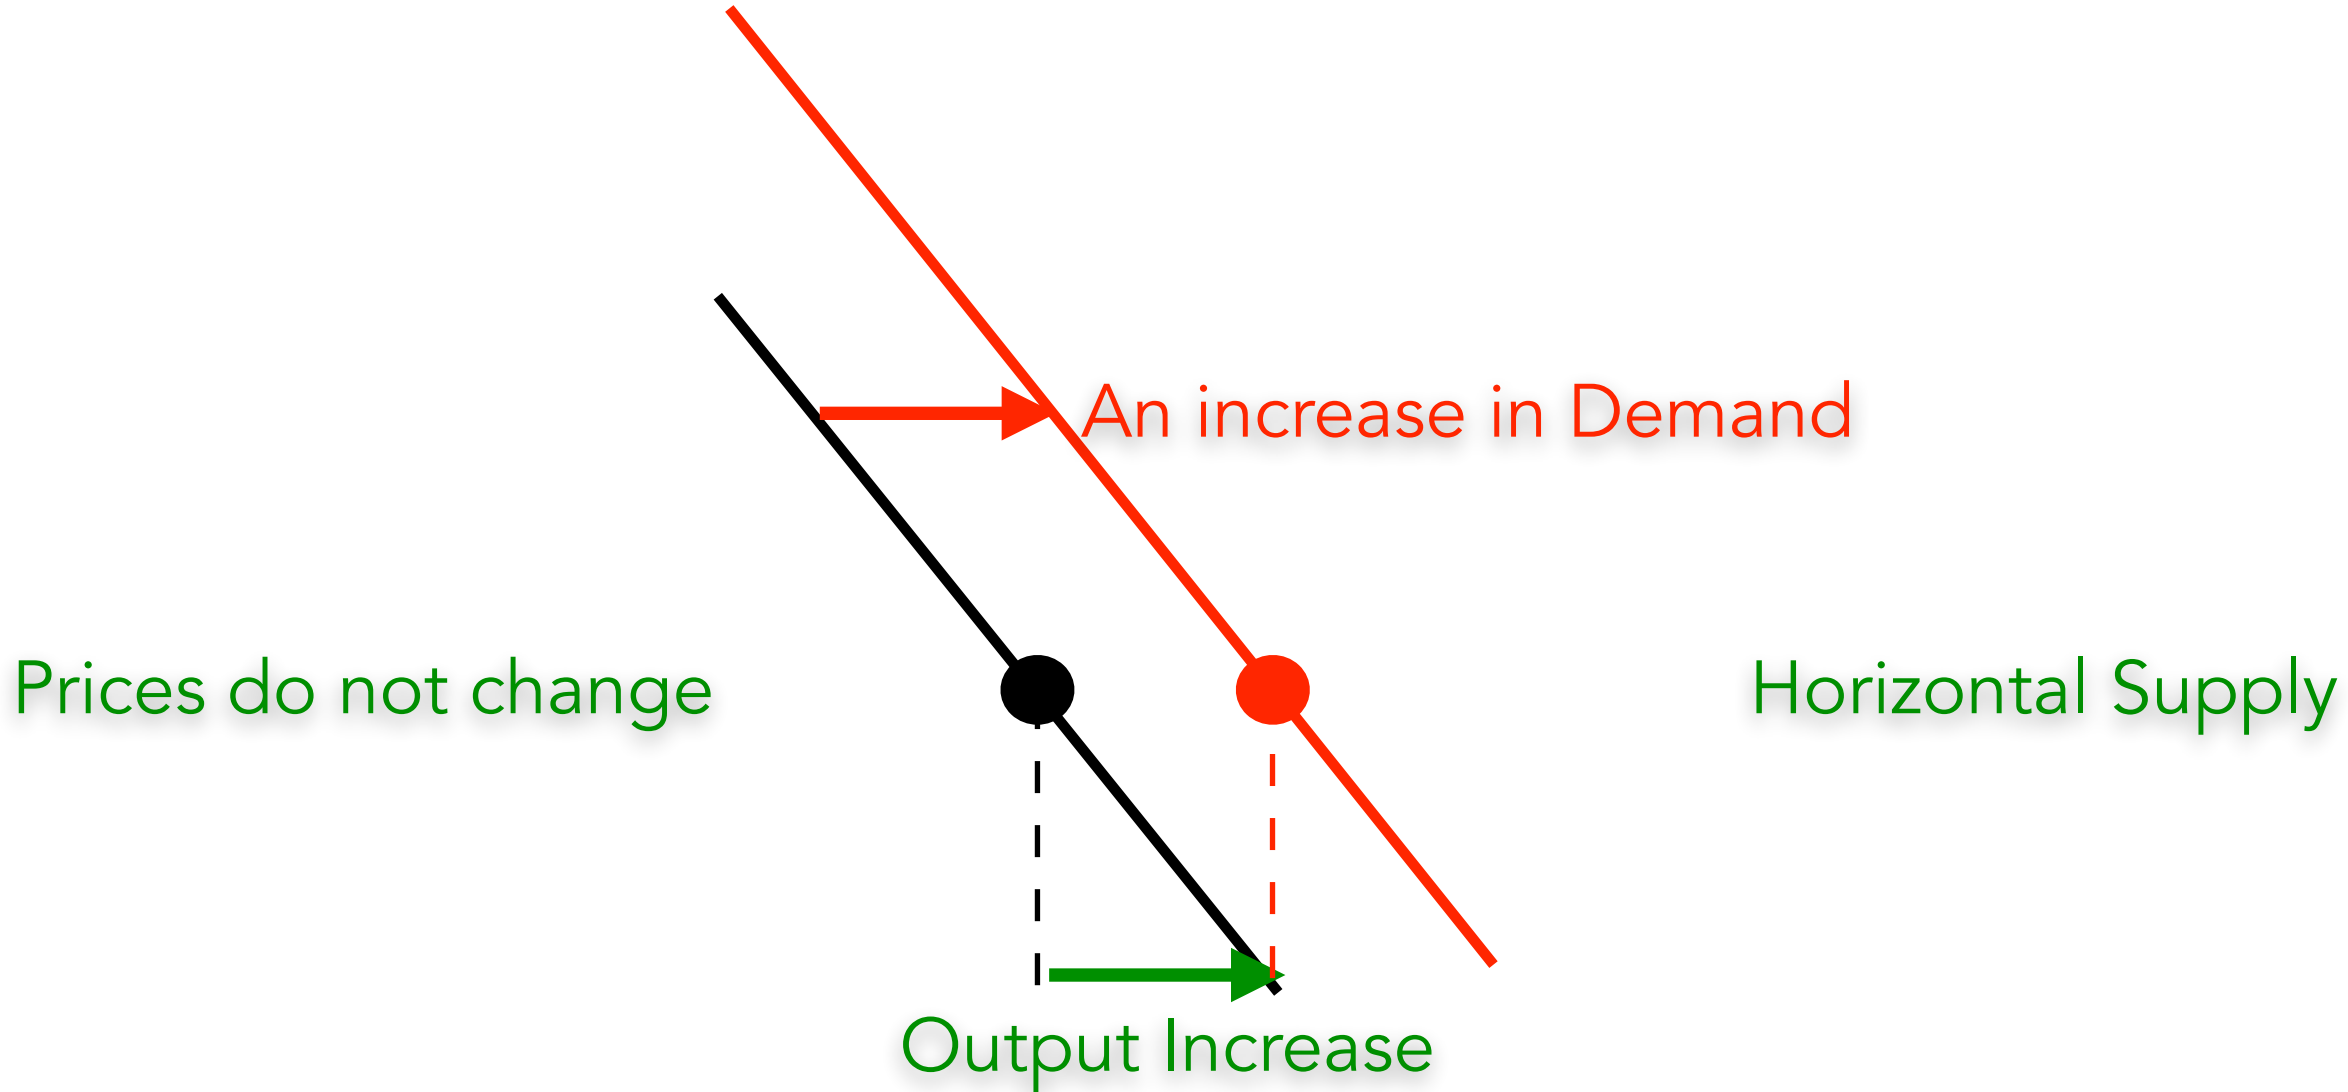

Supply is upward  
sloping: firms raise  
both prices and output

How firms react to an increase in Aggregate Demand depends on where the Economy is...

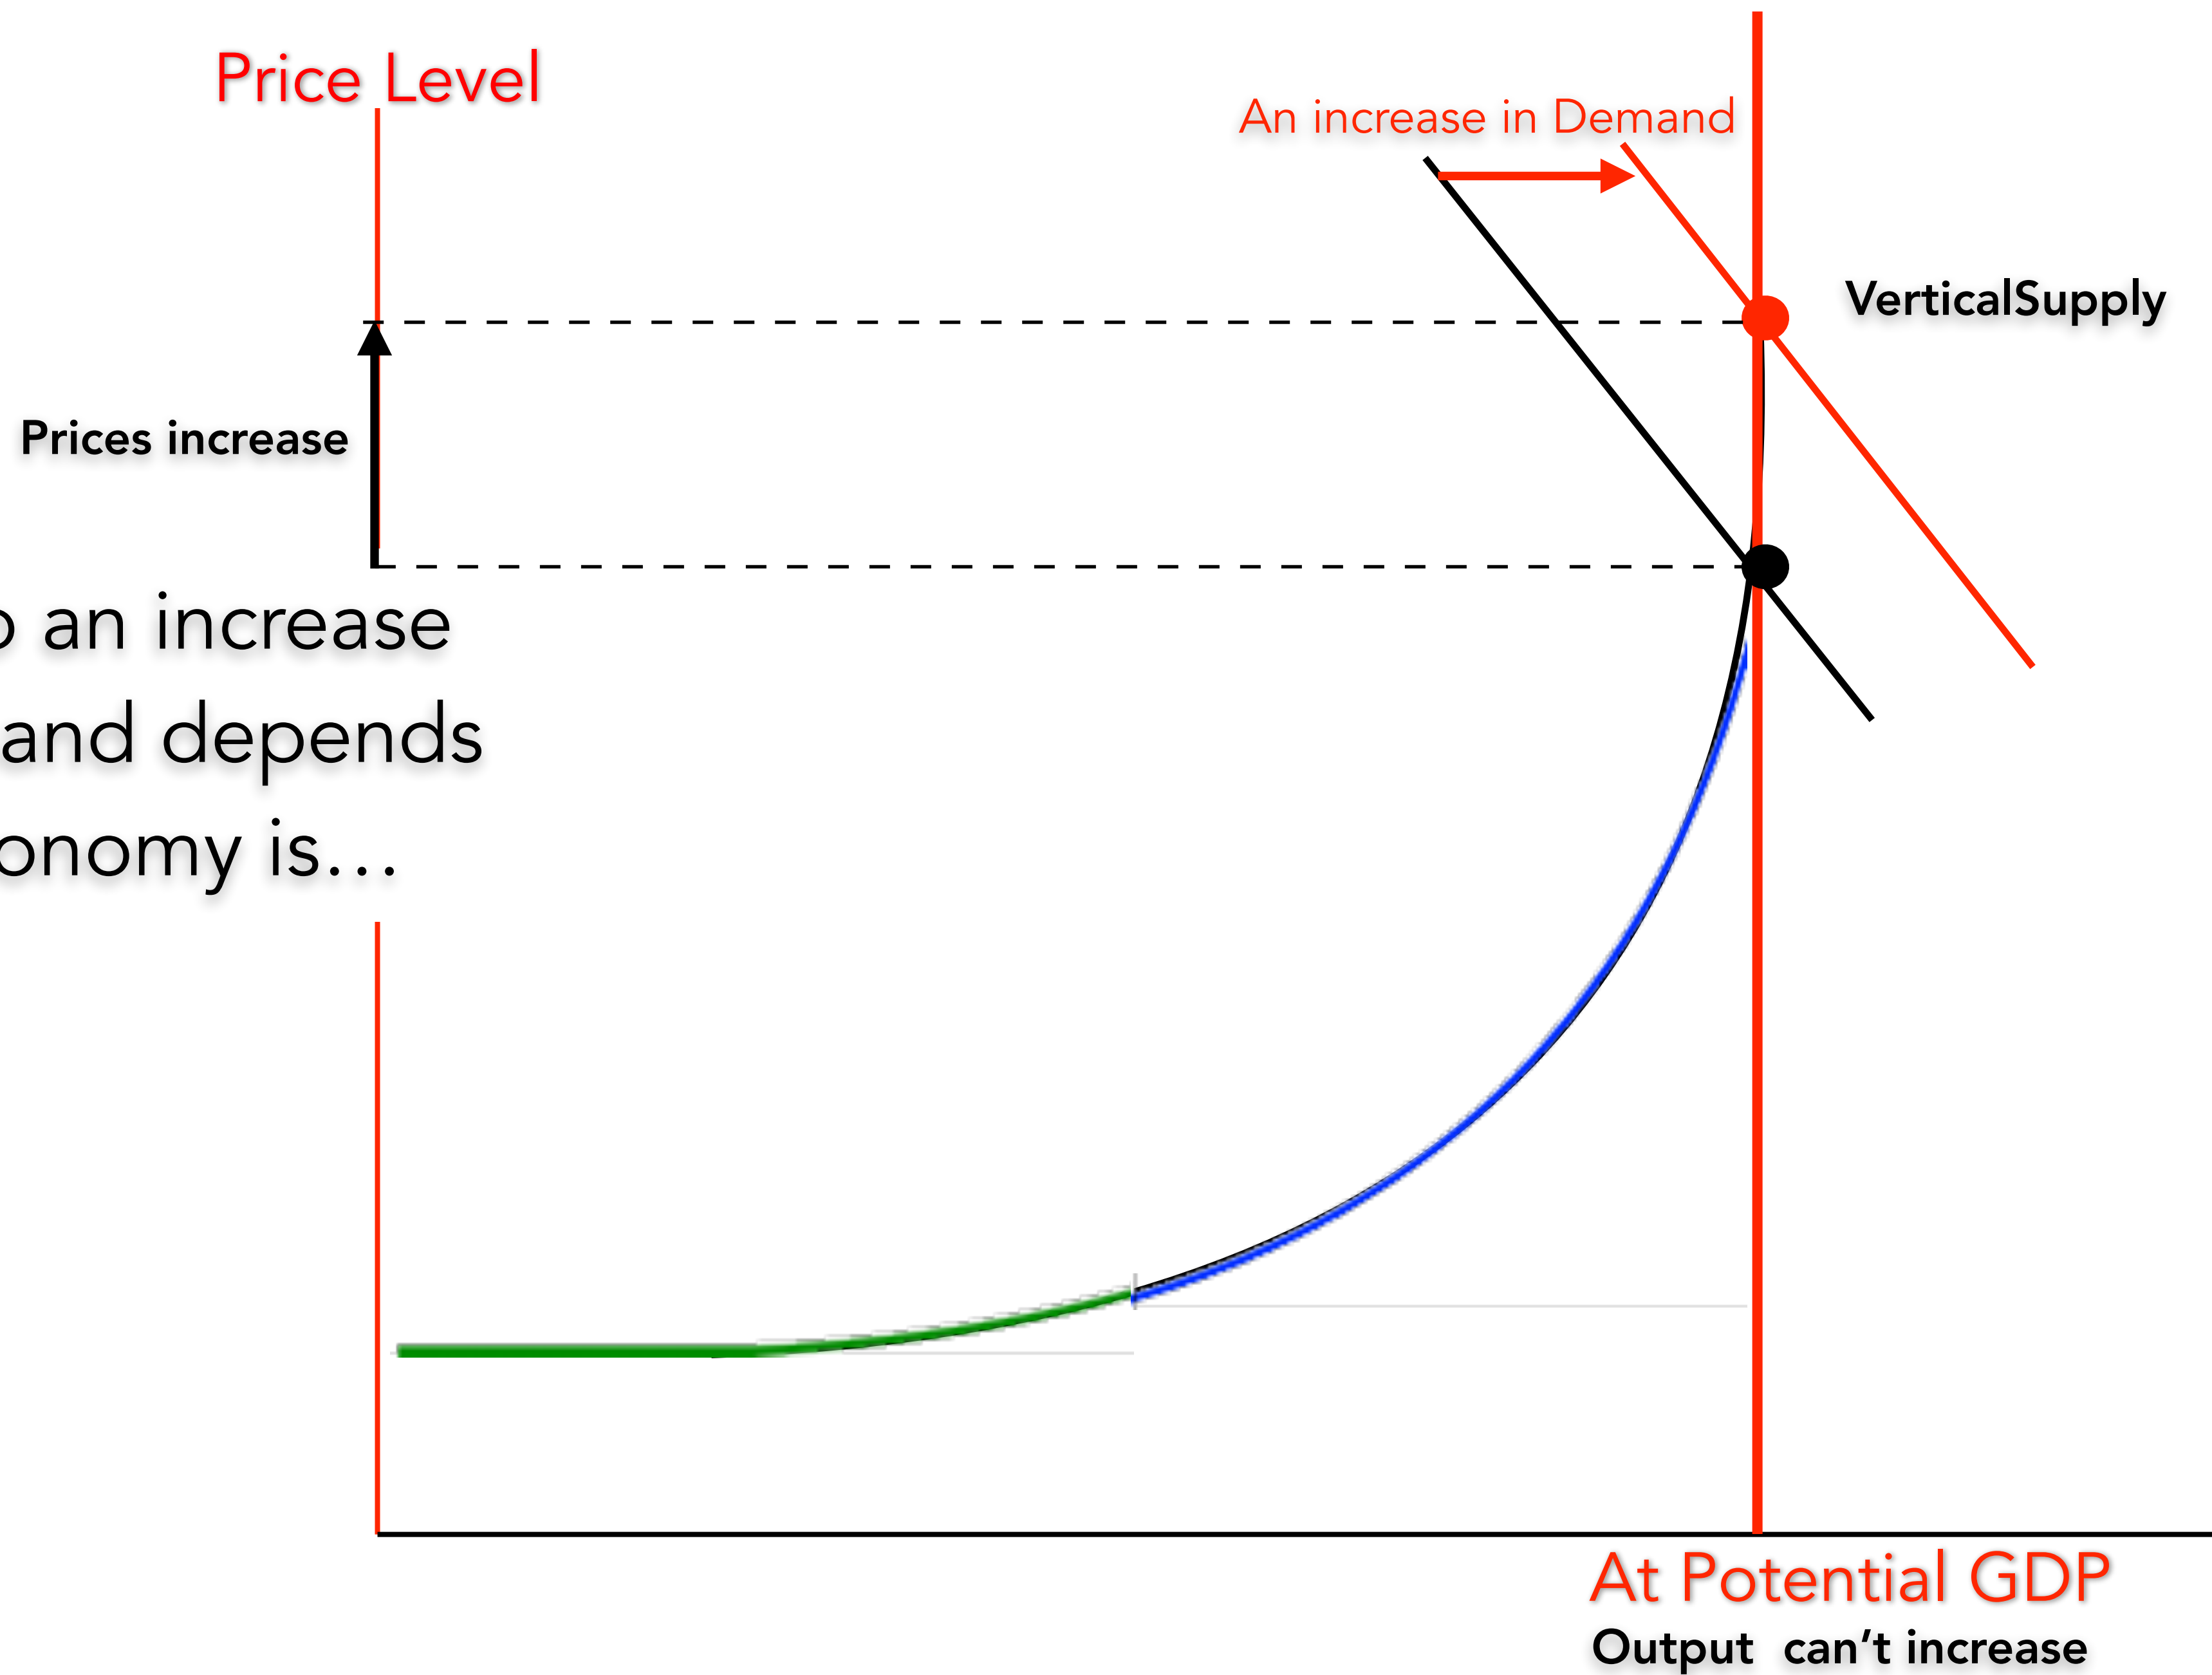

Supply is horizontal: firms  
increase output but can't  
raise prices

SRRAS(Wages fixed)

How firms react to an increase in Aggregate Demand depends on where the Economy is...

MPC = 0.75

An increase in G  
 $\Delta G = +70$

$\Delta AE = 280$

$\Delta AD = 280$

$\Delta G$

$$\Delta Y = \Delta G \left( \frac{1}{1 - MPC} \right)$$

$\Delta Y = 280$
