

-100

This infinite sum of terms
equals:

$$\left(\frac{1}{1-0.9} \right)$$

$$\left(\frac{1}{0.1}\right)$$

= - 100

$\equiv -100(10)$

-

1,000

Δ Spending \equiv

Original
drop in
consumption

A large, black-outlined speech bubble with a tail pointing towards the bottom right. Inside the bubble, the text "Total drop in consumption after many lose their livelihood" is written in a black, sans-serif font. The word "Total" is bolded.

Total drop in
consumption after many
lose their livelihood

This infinite sum of terms
equals:

$$-100 \left(\frac{1}{1-0.9} \right) = -100 \left(\frac{1}{0.1} \right)$$

Total drop in
consumption after many
lose their livelihood

Original
drop in
consumption

$$= -100 (10)$$

$$\Delta \text{Spending} = -1,000$$
