

Elasticity Changes Along Supply

$e \gamma^* \text{inelastic}$

All Supply lines that Cut
Horizontal Axis are Inelastic

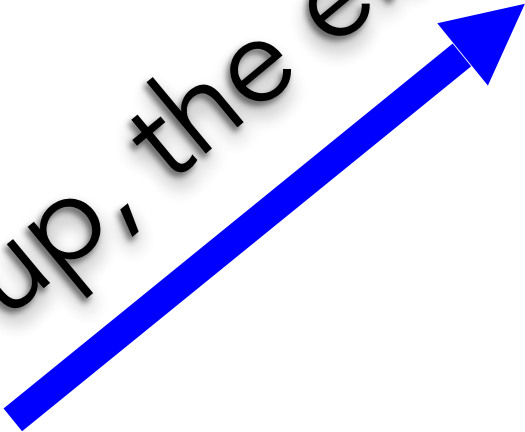

Regardless of how steep or flat the line is, the elasticity at any and all points along is **Less than one:**
Inelastic

e_p^s

$=$

0

As we go up, the elasticity **increase**

But is never 1 and never
greater than 1

At this point the
elasticity starts **very**
small

Elasticity Changes Along Supply

Regardless of how steep or flat the line is, the elasticity at any and all points along is **Less than one**:

Inelastic

All Supply lines that Cut
Horizontal Axis are **Inelastic**
