

Eventually, the plant will be crowded...

🔍 Additional workers take space and tools away from other workers

Equipment breaks down more often from overuse

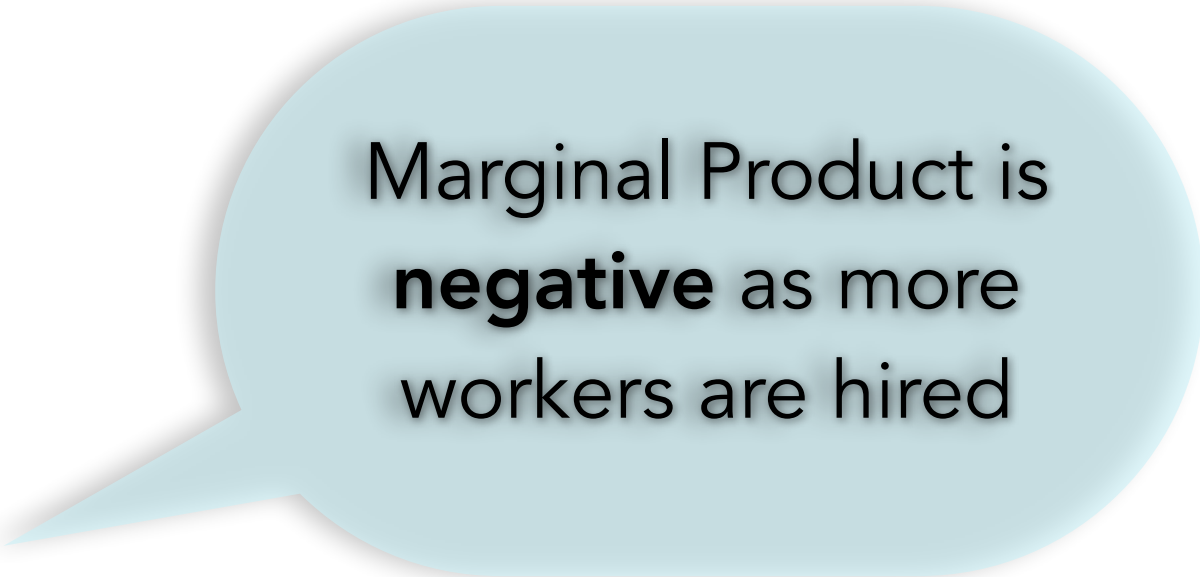

New workers slow down other workers
making them less productive

What happens if we continue to add
workers to a plant of fixed size?

Marginal Product Decrease

Marginal Product is
negative as more
workers are hired

What happens if we continue to add workers to a plant of **fixed size**?

- 🔧 Eventually, the plant will be crowded...
- 🔧 Additional workers **take space and tools away** from other workers
- 🔧 Equipment breaks down more often from overuse

➡ New workers **slow down** other workers making them **less productive**

➡ Marginal Product **Decrease**

Marginal Product is **negative** as more workers are hired
