

Adds "goods" as well as "bads"

Higher expenses to treat lung disease, diabetes, obesity **add** to
GDP...

Higher expenses to clean up an oil spill **add** to GDP...

Production of cigarettes and pesticides **add** to GDP

Higher GDP levels achieved in this way do not represent an **improvement** in the well being of the country, quite the contrary they represent a **decline** in welfare.

Limitations of GDP

Limitations of GDP

Adds “goods” as well as “bads”

- Higher expenses to treat lung disease, diabetes, obesity add to GDP...
- Higher expenses to clean up an oil spill add to GDP...
- Production of cigarettes and pesticides add to GDP

Higher GDP levels achieved in this way do not represent an improvement in the well being of the country, quite the contrary they represent a decline in welfare.

Rank ↕	Country/Territory ↕	GDP 2019
	<i>World</i> ^[19]	87,265,226
1	 United States	21,439,453
—	 <i>European Union</i> ^{[23][n 1]}	18,705,132
2	 China ^[n 2]	14,140,163
3	 Japan	5,154,475
