

Demand increases

Supply Increase

If these two happen  
at the same time

The image features a horizontal line with arrows at both ends, pointing left and right. The text "If these two happen" is positioned above the line, and "at the same time" is positioned below it.

If the Increase in Demand is larger (a bigger shift) than the increase in Supply, Price will increase

If the Increase in Supply is larger  
(a bigger shift) than the increase  
in Demand, Price will decrease

If the Increase is Demand  
is the same as the  
increase in Supply, Price  
will stay the same

Quantity will  
definitely increase

Demand Increase

If these two happen  
at the same time

Supply Increase

If the Increase is Demand  
is the **same** as the  
increase in Supply, Price  
will stay the **same**

Quantity will  
definitely increase

If the Increase is Demand is  
**larger** (a bigger shift) than the  
increase in Supply, Price will  
**increase**

If the Increase is Supply is larger  
(a bigger shift) than the increase  
in Demand, Price will **decrease**
