

#### Quantity Supplied

(Thousands)

#### 

### Supply is Horizontal

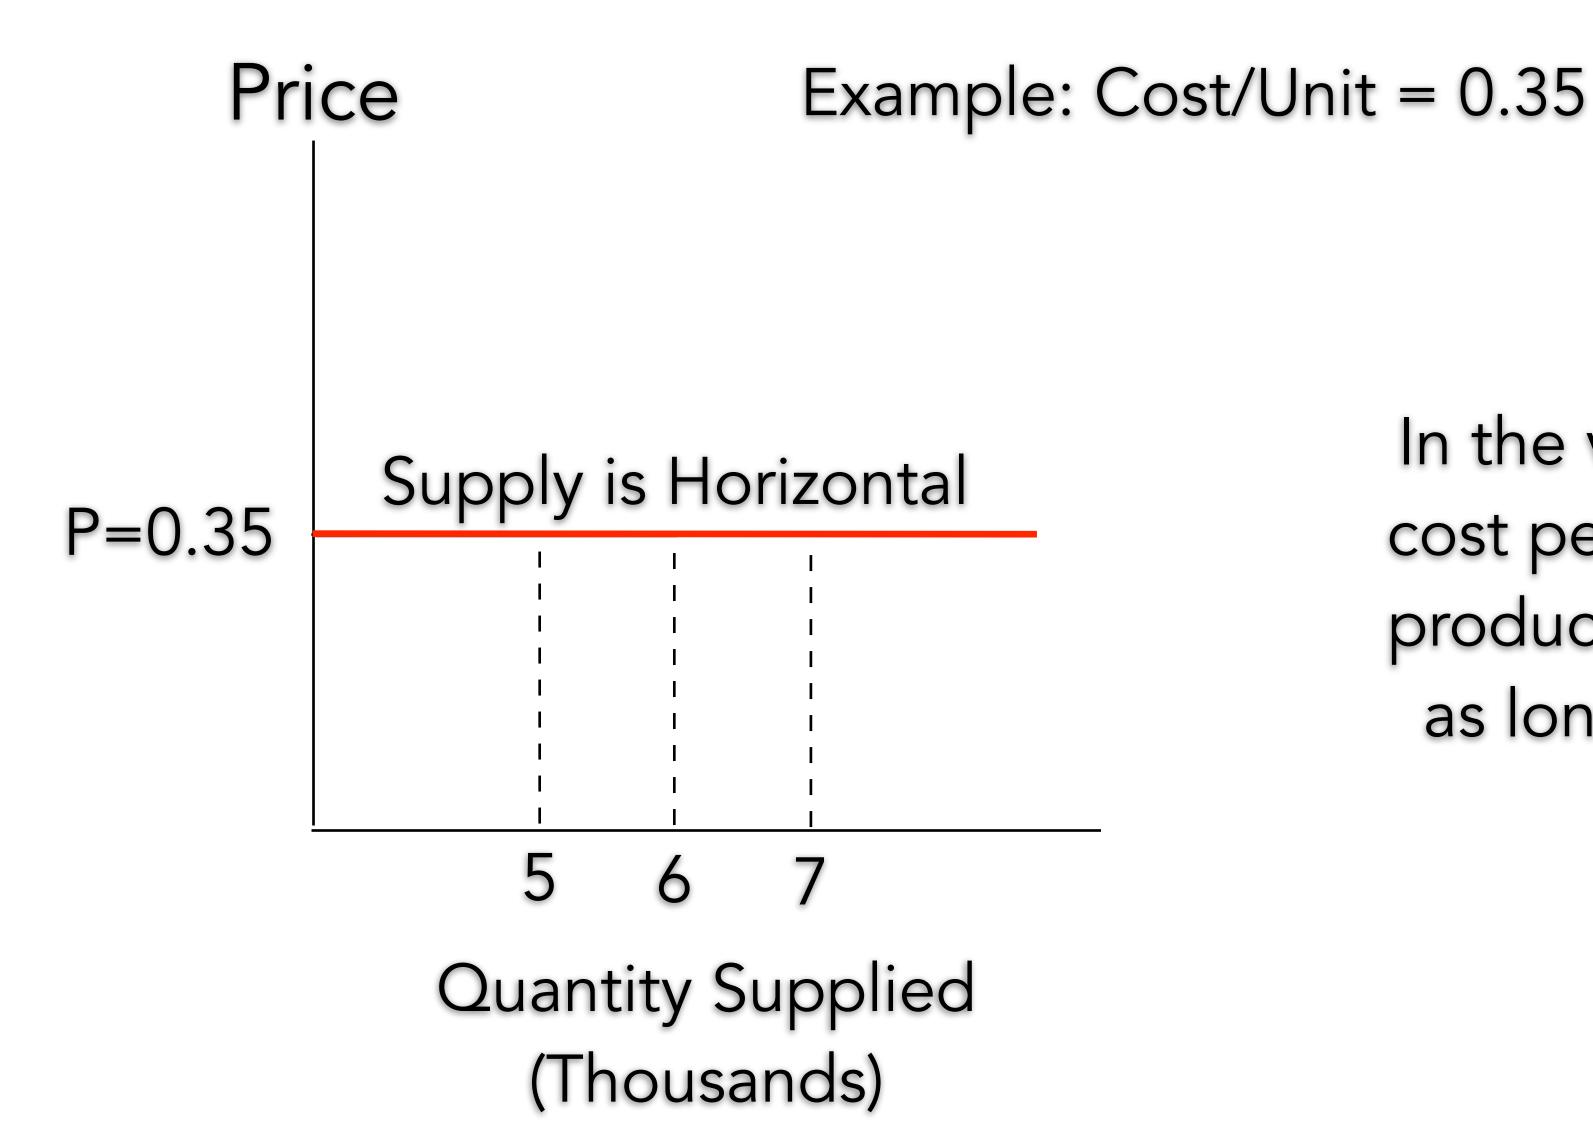

# Cost per unit stays the same

In the very unlikely case that the cost per unit stays the same. The producer can supply any amount as long as the price covers the

cost

Example: Cost/Unit = 0.35

## Cost per unit stays the same

In the very unlikely case that the cost per unit stays the same. The producer can supply any amount as long as the price covers the cost
