Personal Consumption Expenditures	9,734
Depreciation	1,687
Wages	7,874
Indirect Business Taxes	1,041
Rental Income	65
Gross Private Domestic Investment	2,125
Profits	2,638
Exports	1,643
Government Purchases	2,690
Interest	603
Imports	2,351
Income received from other countries	818
Income paid to other countries	722

In practice there is always a difference because there is a lag between the time when production and incomes are measured. This difference is called the

Statistical Discrepancy = NNP - NI = 29

GDP = C + I + G + X - M	13,841
-------------------------	--------

National Income = Wages +	
Interest+Rents+Profits+Indirect	12,221
Business Taxes	

GNP = GDP - income paid to other	
countries + income received from	13,937
other countries	

12,250 NNP = GNP - Depreciation

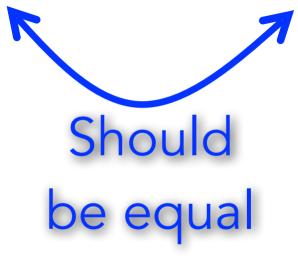

Total Incomes \$12,221

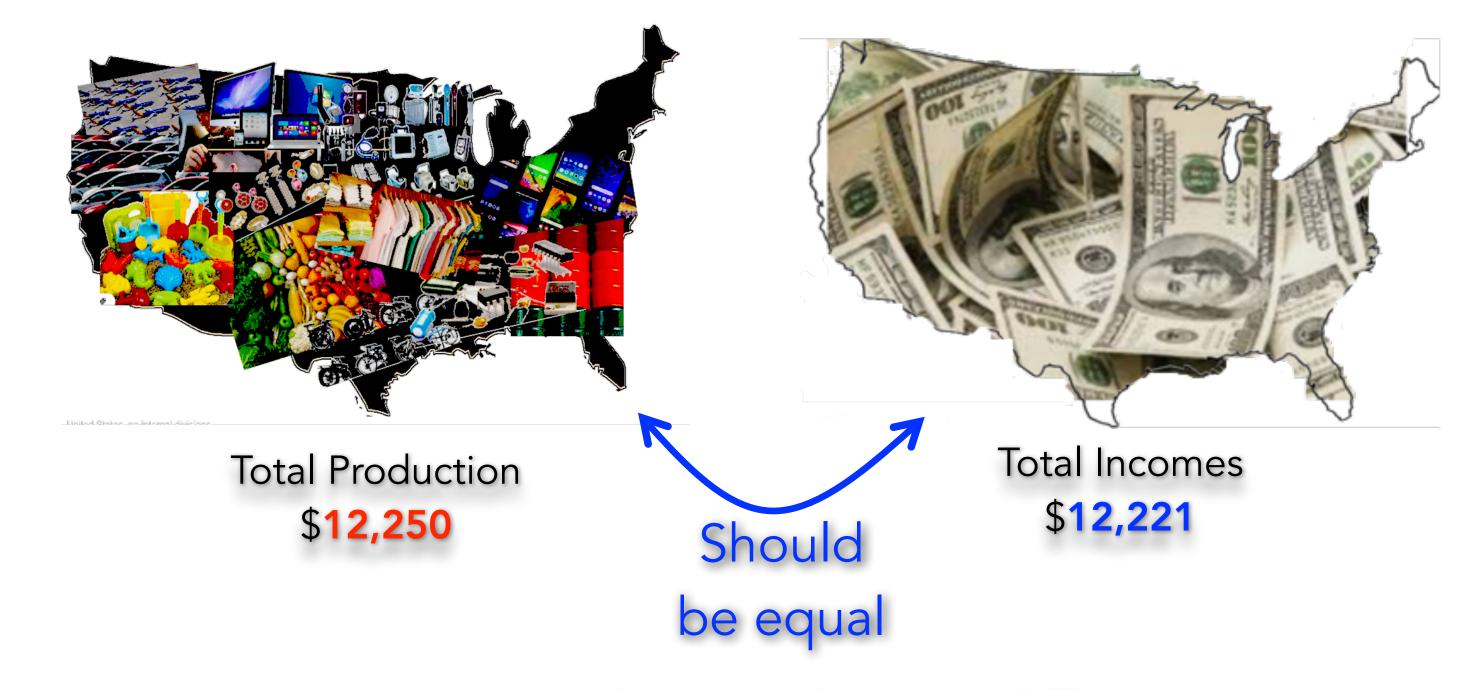

Total Production is always equal to Total Incomes

Total Production \$12,250

Personal Consumption Expenditures (9,734
