Net Investment = Gross Investment - Depreciation

If Gross Investment is equal to Depreciation

If you only buy the equipment needed to replace the pieces that wear out

Net Investment is Zero

If Gross Investment is smaller than Depreciation

If you buy fewer pieces than the equipment that wears out

Net Investment is Negative

The size of the stock of capital does not change

The stock of capital will be smaller

Net Investment - Gross Investment - Depreciation

If Gross Investment is equal to Depreciation

If Gross Investment is smaller than Depreciation

If you only buy
the equipment
needed to
replace the pieces
that wear out

Net Investment is Zero

Net Investment is Negative

If you buy fewer pieces than the equipment that wears out

The size of the stock of capital does not change

The stock of capital will be smaller
