In the next example, assume that we know how many machines we want to use and we need to decide how many workers to hire

$$K = 6$$

L = ?

In the next example, assume that we know how many

$K = 6$

machines we want to use and we need to decide how many

$L = ?$

workers to hire

If we use 6 machines

Capital (K)						
6	692	980	1200	1384	1550	1692
5	632	896	1096	1264	1410	1550
4	564	800	960	1128	1264	1384
3	490	692	846	980	1096	1200
2	400	564	692	800	896	980
1	282	400	490	564	632	692
	1	2	3	4	5	6

Labor (L)
